

Tensor Networks from Simulation to Holography

4-6 October 2017

DESY Hamburg, Germany

Seminar room ZOQ (bldg. 90)

Speakers:

Debasish Banerjee (DESY)

Mari Carmen Banuls (MPQ Munich)

Ippei Danshita (Kyoto Univ.)

Johanna Erdmenger (Univ. Würzburg)

Michal Heller (AEI Golm)

Esteban Martinez (IQOQI, Innsbruck)

Simone Montangero (Univ. Ulm)

Roman Orus (Univ. Mainz)

Michael Walter (Stanford Univ.)

The workshop brings together experts in the areas of ultra-cold atoms, solid state systems, lattice gauge theories and holography to discuss applications of tensor network techniques and exchange methods, experience and results.

Organizing Committee:

Karl Jansen (Chair), Ludwig Mathey, Volker Schomerus

<http://www.wpc-hh.de>

This workshop is organised in collaboration
with the John von Neumann-Institute for
Computing (NIC, DESY Zeuthen).
