

Helmholtz Alliance for Astroparticle Physics

HAP Dark Matter 2013

From astronomical observations to astroparticle theory

Joint workshop Astroparticle Theory and Dark Universe

Topics:

- Astronomical observations
 - galactic dynamics, gravitational lensing and structure formation
- Experimental searches
 - direct, indirect and at the LHC
- Particle candidates
 - from neutrinos to axions, scalars, and SUSY
- Numerical tools
 - combined fits and precision calculations

Scientific coordination:

Michael Klasen

michael.klasen@uni-muenster.de

Klaus Eitel

klaus.eitel@kit.edu

Administrative contact:

Katharina Krist

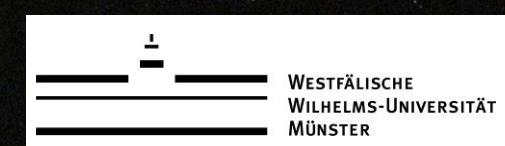

katharina.krist@uni-muenster.de

Hörsaal S1 (Schlossplatz 2), Universität Münster

February 18-20, 2013
