

MTCA.4 Products and Solutions for accelerators at CAEN ELS

Thursday 11 December 2014 14:45 (15 minutes)

An overview of CAEN ELS products related to the MTCA.4 standard will be introduced. The HV-PANDA multi-channel High-Voltage power supply module, the FMC-Pico-1M4 quad-channel low-current measurement front-end that can be used in conjunction with the DAMC-FMC25 board for quadrature BPM applications and the dual/quad channel SPF+ FMC modules will be presented as self-developed or distributed and supported solutions.
