

Status of CTP Simulation

DESY ATLAS Meeting

Wolfgang Ehrenfeld

DESY - Hamburg

13. Oktober 2006

- adapted code to use new CTP_RDO class from TrigT1Result package
 - class from David Berge
 - based on class from Attila Krasznahorkay
 - added a few set member functions
 - needs commit to cvs
- work going on:
 - trigger item ordering (ctp_id from database)
 - special triggers (random trigger, prescaled clock, ...)
- testing (prescales)
 - running simulation
 - reading ctp output in root (CBNTAA)

HLT - LVL1Conversion

- **Till Eifert likes to test the LVL1Conversion with the new HLT steering**
- **... old or new (:-)) CTP simulation**
 - **figuring out what is needed**
 - **concentrate on simulation for the next weeks**
