

Status Naf - Issues

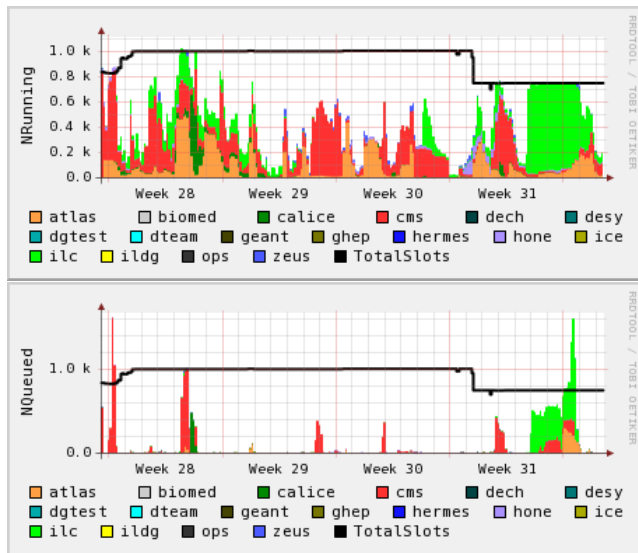

- Lustre client hang ups:
 - ▶ new client is available
 - ▶ will be installed, when a node hangs
 - ▶ node has to be rebooted to install the update
- tcsh2:
 - ▶ Dimm has to be exchanged because of too many ECC errors
 - ▶ Batch master runs on this machine
 - ▶ Need a downtime of a few minutes
 - ▶ Will be announced
- Login hosts:
 - ▶ Have to be rebooted due to software updates
 - ▶ Will be announced a day before
 - ▶ Reboot of the first has been done
 - ▶ Only logged in users without valid tokens will be logged off

Status - Monitoring

Monitoring

- Node status and history display with Hobbit is in progress: will be available to VO-Naf-Admins
- SGE Monitoring with ganglia like output is in progress with history and current status
- Grid-share monitoring is running (to use with care regarding fair-shares)
