## Physics opportunities at an EIC beyond the ones discussed in the White Paper

*Thursday, April 14, 2016 11:00 AM (20 minutes)*

In this talk several new physics opportunities at an EIC beyond the key measurements discussed in the EIC White paper (arXiv:1212.1701) will be highlighted, this includes measurements with jets, how to get access to intrinsic kT and photon structure.

For all measurements first studies will be presented.
