Heavy Flavour results from CMS

Tuesday, April 12, 2016 2:50 PM (15 minutes)

The available statistics of heavy flavored particles collected at the LHC in pp collisions at 7, 8 and 13 TeV provides an excellent opportunity to test the standard model and probe for new physics effects. A review of selected recent measurements on heavy flavors (production and properties, rare decays, CP violation, exotic and standard quarkonia) by CMS based on LHC Run I and Run II data is presented.

Primary author: Prof. CMS, Collaboration (CINCO)

Presenter: Prof. CHEN, Kai-Feng (National Taiwan University)

Session Classification: WG4 Heavy Flavours

Track Classification: Heavy Flavours (Charm, Beauty and Top)
