

# XXIV International Workshop on Deep-Inelastic Scattering and Related Subjects (DIS16)

Contribution ID: 277

Type: **not specified**

## Heavy Flavour results from CMS

*Tuesday 12 April 2016 14:50 (15 minutes)*

The available statistics of heavy flavored particles collected at the LHC in pp collisions at 7, 8 and 13 TeV provides an excellent opportunity to test the standard model and probe for new physics effects. A review of selected recent measurements on heavy flavors (production and properties, rare decays, CP violation, exotic and standard quarkonia) by CMS based on LHC Run I and Run II data is presented.

**Primary author:** Prof. CMS, Collaboration (CINCO)

**Presenter:** Prof. CHEN, Kai-Feng (National Taiwan University)

**Session Classification:** WG4 Heavy Flavours

**Track Classification:** Heavy Flavours (Charm, Beauty and Top)
