

REF 2015 (Resummation, Evolution, Factorization)

Wednesday 4 November 2015

TMD Phenomenology at the LHC: chair: H. Jung - BAH 1 & 2 (14:00 - 19:30)

| time | [id] title | presenter |
|-------|---|---------------------|
| 14:00 | [75] Effects of final-state gluon radiation on Quarkonium polarization | BARANOV, Serguei |
| 14:15 | [46] Discussion | |
| 14:30 | [35] Selected recent results in phenomenology of High Energy Factorization | Dr KUTAK, Krzysztof |
| 14:55 | [48] Discussion | |
| 15:10 | Coffee | |
| 15:40 | [63] Small-x improved TMD factorization for forward particle production | Dr MARQUET, Cyrille |
| 16:05 | [50] Discussion | |
| 16:20 | [55] Towards NLO calculations in Parton Reggeization Approach: Diphoton hadroproduction at NLO* | Mr NEFEDOV, Maxim |
| 16:45 | [52] Discussion | |
| 17:00 | [69] Significance of gluon density at soft and hard processes at LHC | LIPATOV, Artem |
| 17:25 | [54] Discussion | |
