

Summer student 2015 @ DESY, Zeuthen

Thursday 10 September 2015

Final students report (10:00 - 12:10)

time	[id] title	presenter
10:00	[54] Sukee, Anupong: Calibration and Optimization of the TAXI	
10:15	[55] Settanta, Giulio: Study of partial arrays impact on CTA optimization	
10:30	[56] Joyce, Amy: Constraints from the neutrino channel on the brightest Gamma-ray burst	
10:45	[57] Richter, Monika: Next-to-leading order QCD corrections to the total cross section for $e+e\rightarrow t\bar{t}$.	
11:00	Break	
11:10	[59] Seitova, Diana: Simulations of Core+Halo Distribution of Emittance Data Measured in 2011	
11:25	[60] Vitoratou, Niki: Beam dynamics study of RF and solenoid fields without space charge	
11:40	[58] Zervou, Alkistis: Path integrals and the Metropolis metode	
11:55	[61] Di Bella, Marco: Path integrals and the Metropolis metode
