

# The Large Scale European XFEL MicroTCA Installation

Kay Rehlich

MicroTCA Workshop @ DESY, 9. Dec. 2015

# The Projects: FLASH and XFEL (and REGAE, AMTF)

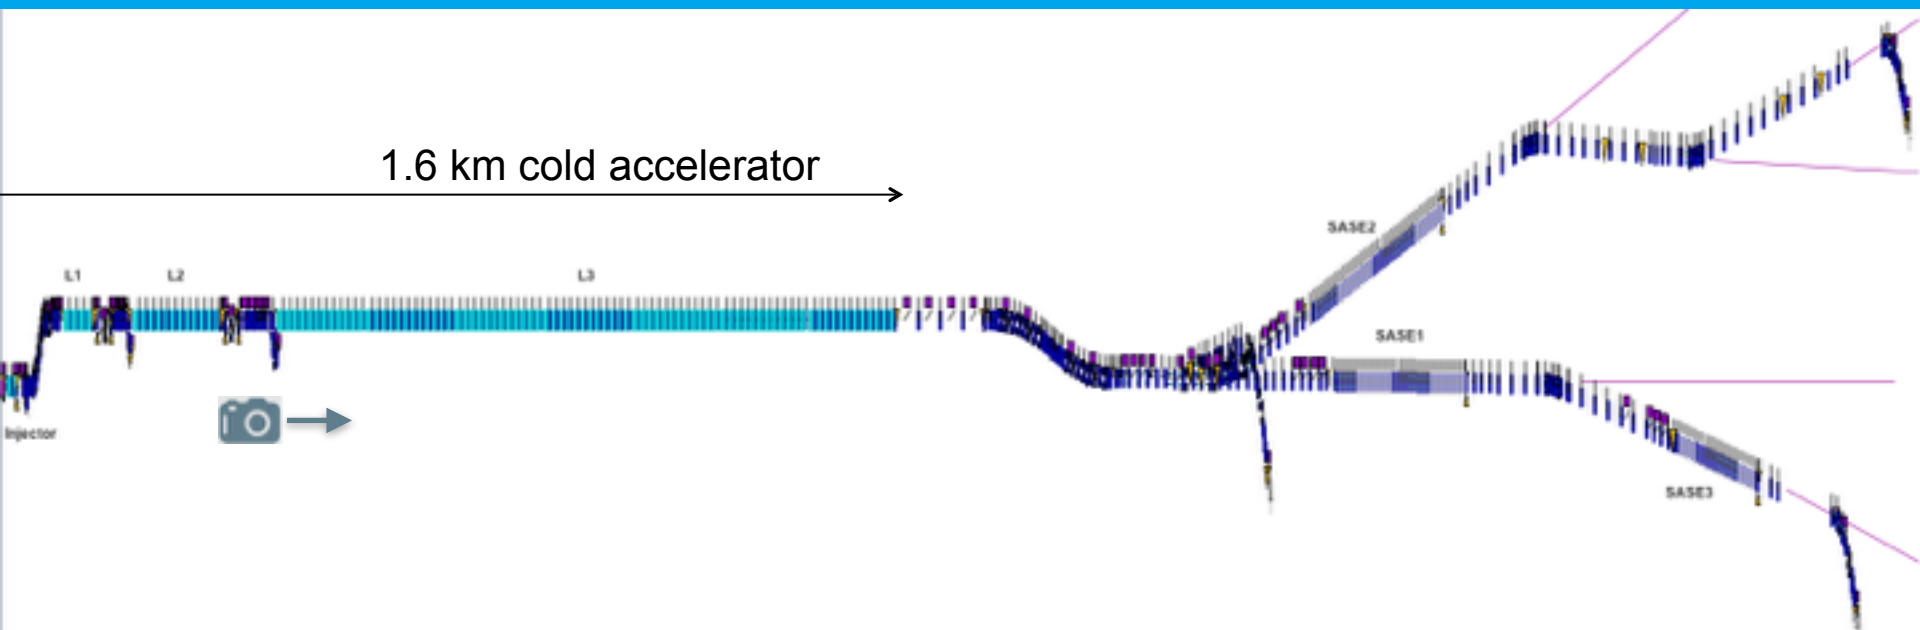

# A MicroTCA Crate in XFEL

One out of 100  
Superconducting  
Accelerator Modules

Klystron

LLRF MicroTCA Crate

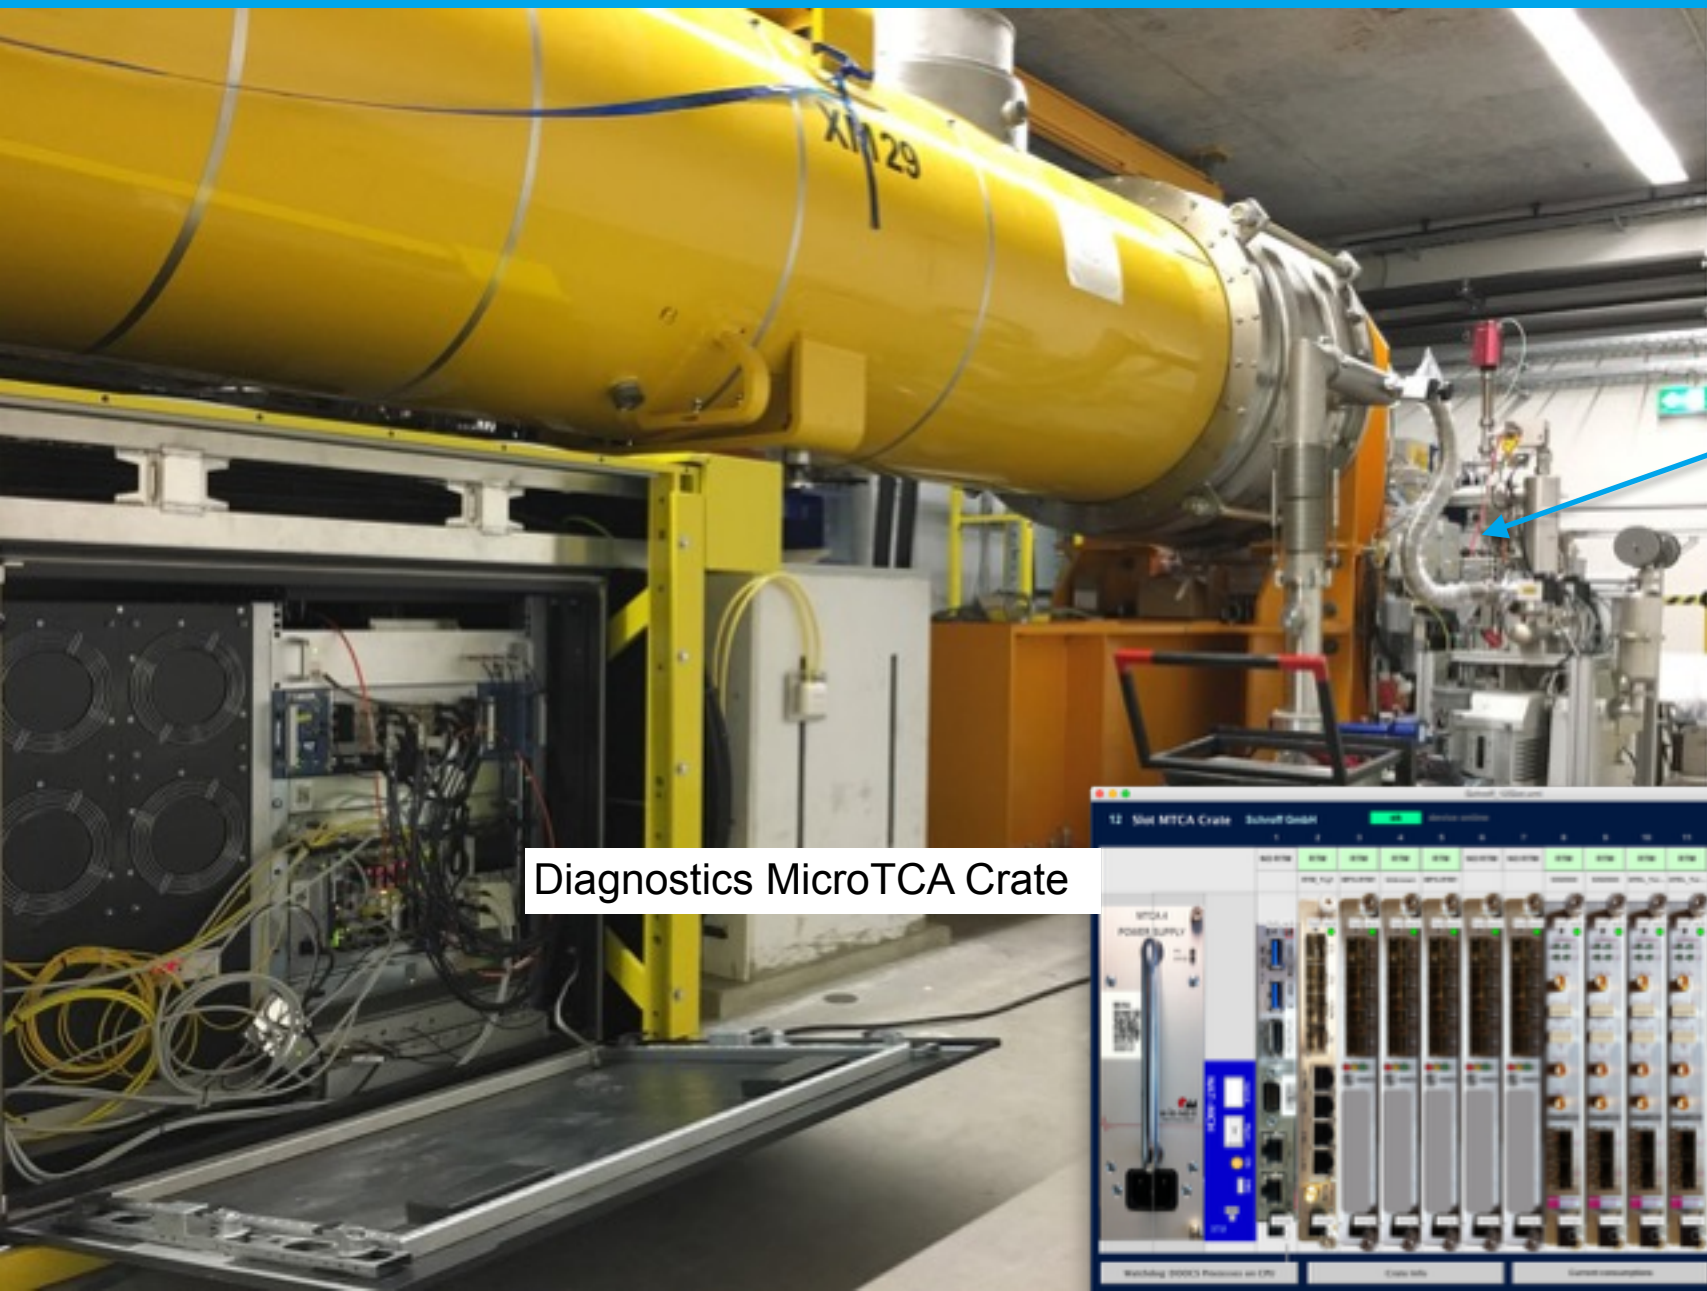

# Planned MicroTCA Crates for XFEL

## Total Number of MicroTCA crates > 200:

- 58 LLRF
- 53 Coupler Interlocks
- 50 Diagnostics
- 21 Special Diagnostics
- 20 Vacuum, Magnets
- 20 Experiments

# A MicroTCA Crate in the Injector

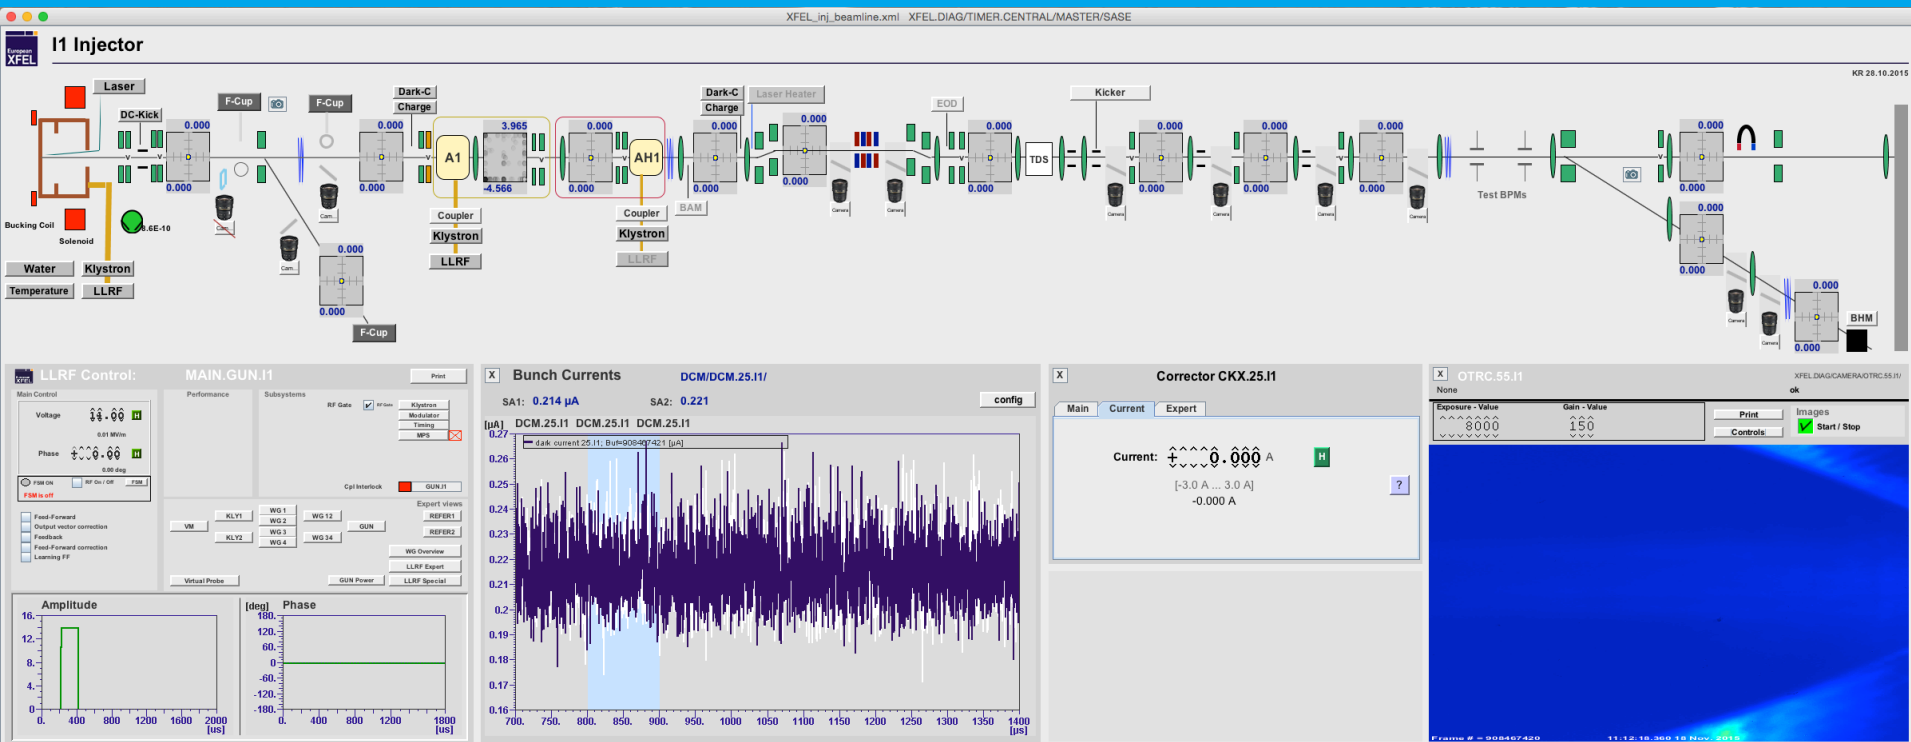

Gun

Diagnostics MicroTCA Crate

# XFEL Injector

- 15 MicroTCA crates are operational
- Cool-down of the two cryo modules just started
- Start of beam operation next week

# XFEL MicroTCA Crates

## Common modules

## Application modules

MCH

CPU

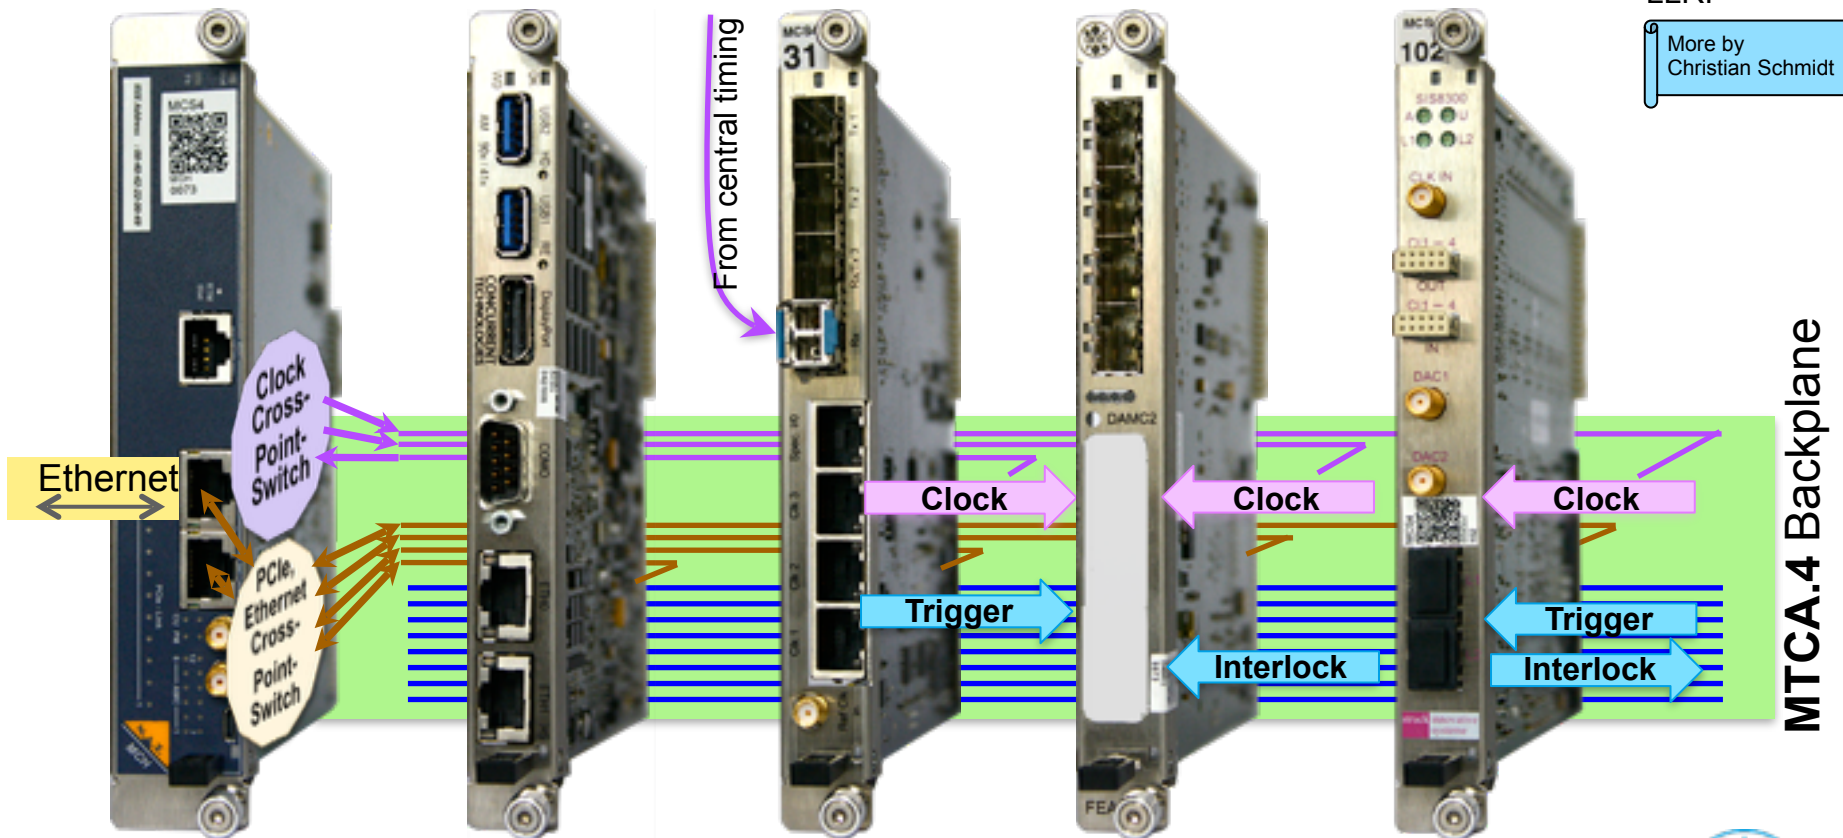

Timing

Machine  
Protection  
System

ADC  
Digi. IO  
Controller  
....

- Diagnostics
- Cpl. Interlocks
- Laser
- ...
- LLRF

Christian Schmidt

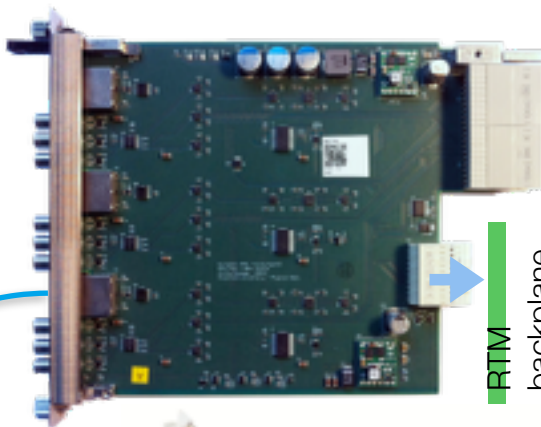

# Timing: Synchronization of all Subsystems

9 Lemo outputs (50 Ohm):

- Triggers, Clocks, Data
- 3 channels with 5ps resolution

> 100 m

RTM

backplane

AMC

RJ45  
LVDS

x2timer /  
NAMC-psTimer  
receiver /transmitter

9 SFP outputs:

- with length compensated fiber links

9 Fiber outputs (ST):

- Triggers, Clocks, Data
- used for modulators

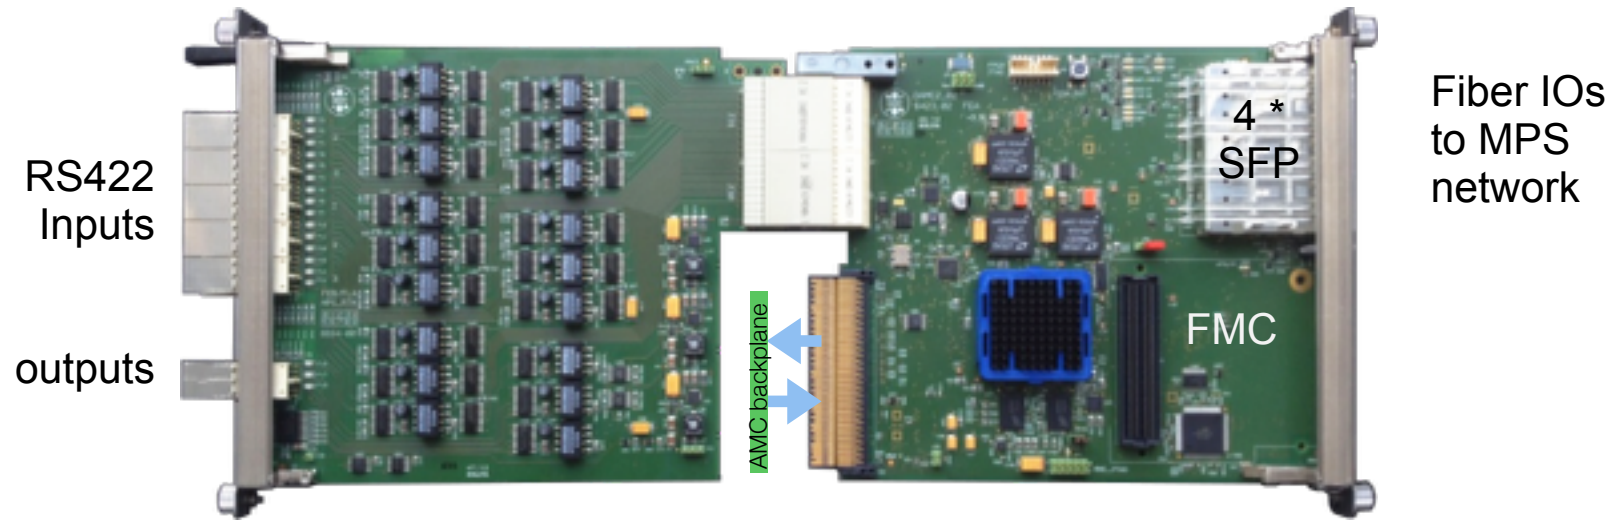

More by  
Christoph Stechmann

# The XFEL Machine Protection Systems

> RTM to adapt subsystems

> AMC = DAMC2

- Virtex-5 FPGA
- ~ 800 Boards for XFEL

**Further Subsystems are based on DAMC2:**

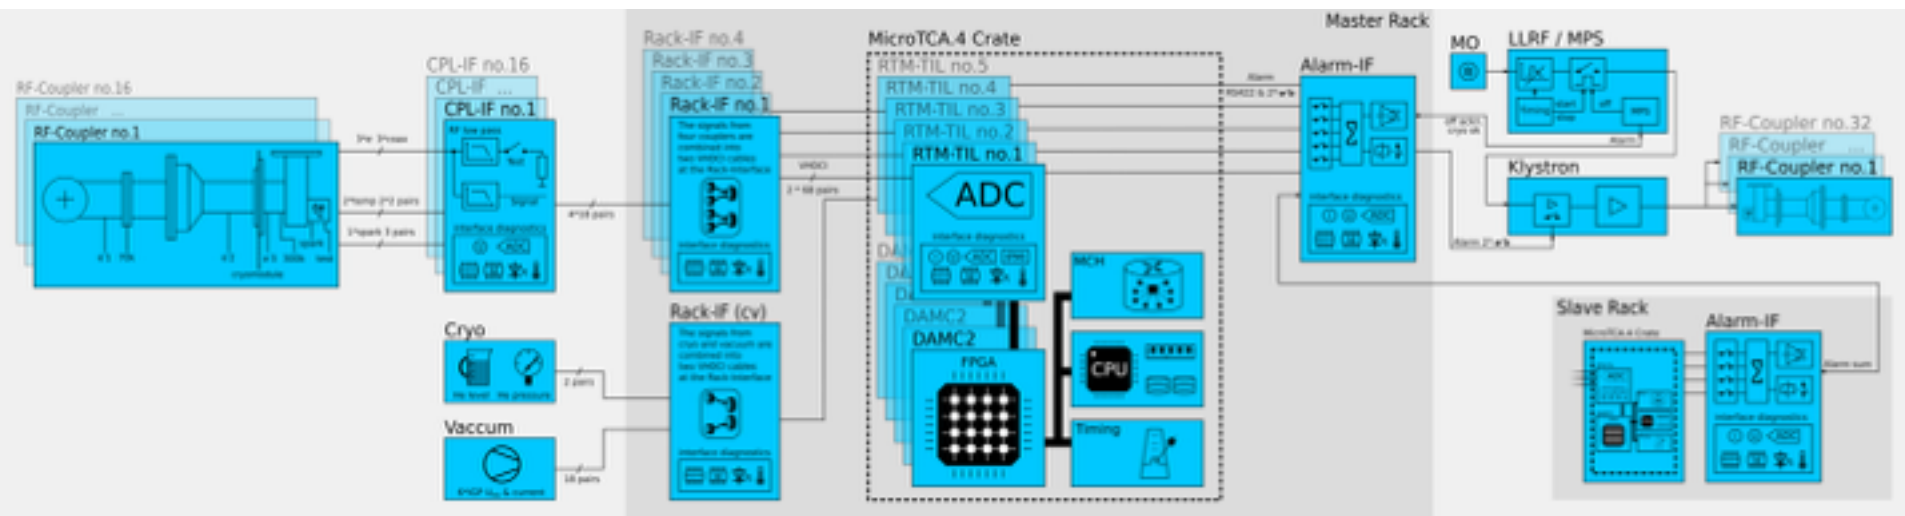

- Beam Loss Monitors
- Beam Position Monitor Interface
- Clock & Trigger Contr. For Exp.
- Wire Scanner

# The Coupler Interlocks

RTM of the  
coupler interlock

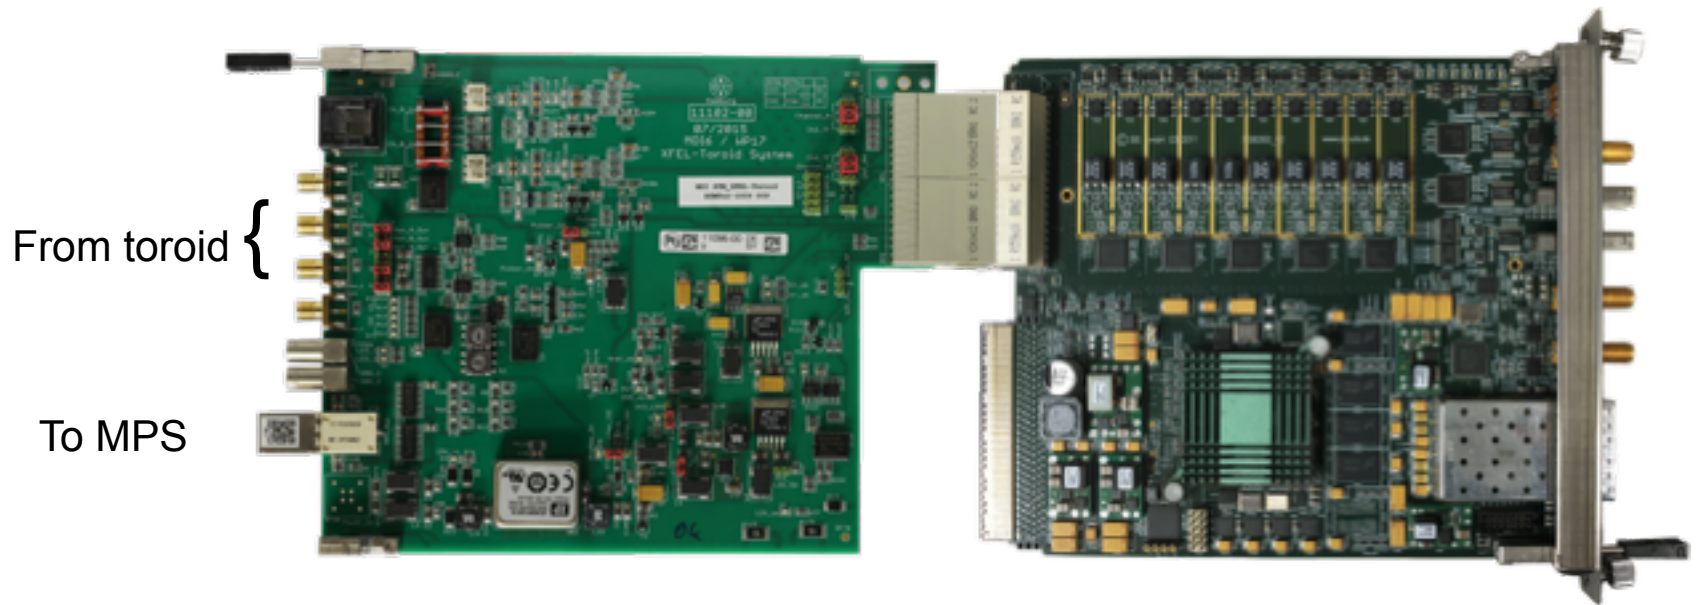

DAMC2

# Toroid Protection System

- > Toroid readout and protection RTM + SIS8300L AMC
- > Low noise:  $\sim 0.2$  pC RMS (old system has 2 pC noise)
- > Firmware features fast commissioning

© T. Lensch, J. Lund-Nielsen, M. Werner

# Tews 32 Channel ADC with Versatile Shaper

## TAMC532:

- Kintex 7 (70T...410T)
  - with  $\geq 2 \times 256\text{MB}$  RAM
- 32 analog channels, configurable
- 12 bit ADC, 75 MSPS
- or 14 bit ADC, 50 MSPS
- Complex low jitter clock generation
- 2 SFP IO
- Application: 128 ch. spectrometer

# Further XFEL Subsystems Based on MicroTCA, COTS

## > Diagnostics

- Photon energy and position, GSPS

## > Special Diagnostics

- Cameras
- Kicker

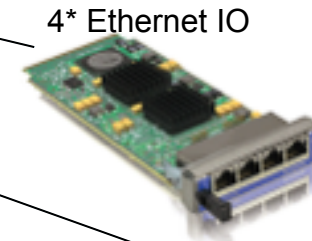

## > Magnets & Vacuum

≤ 7 GSPS ADC

16 \* RS-232 IO

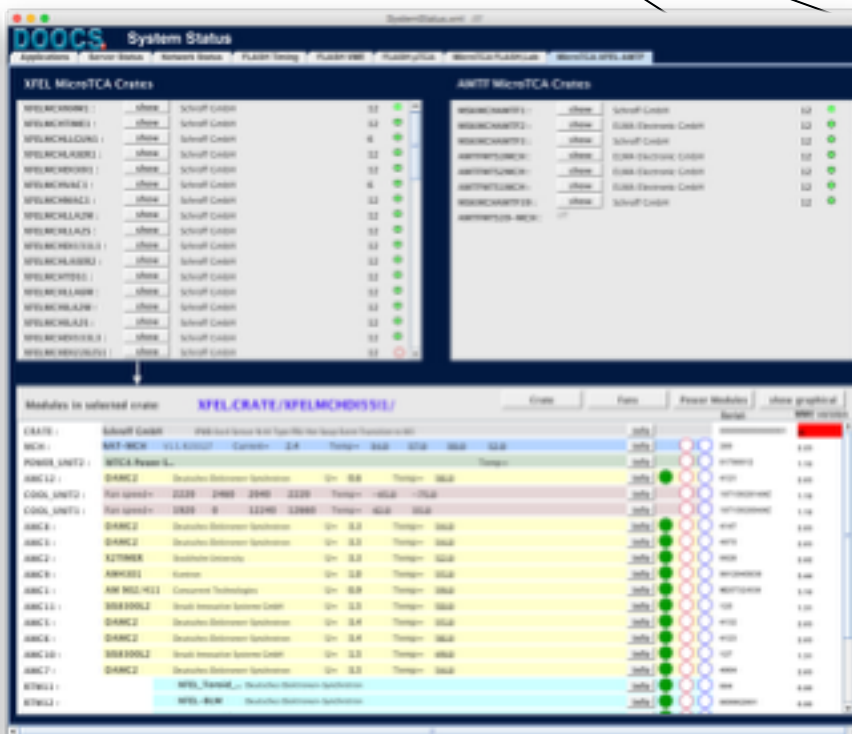

4\* Ethernet IO

Digi/analog IO

4\* CAN IO

## MicroTCA Remote Management Views

## Management View

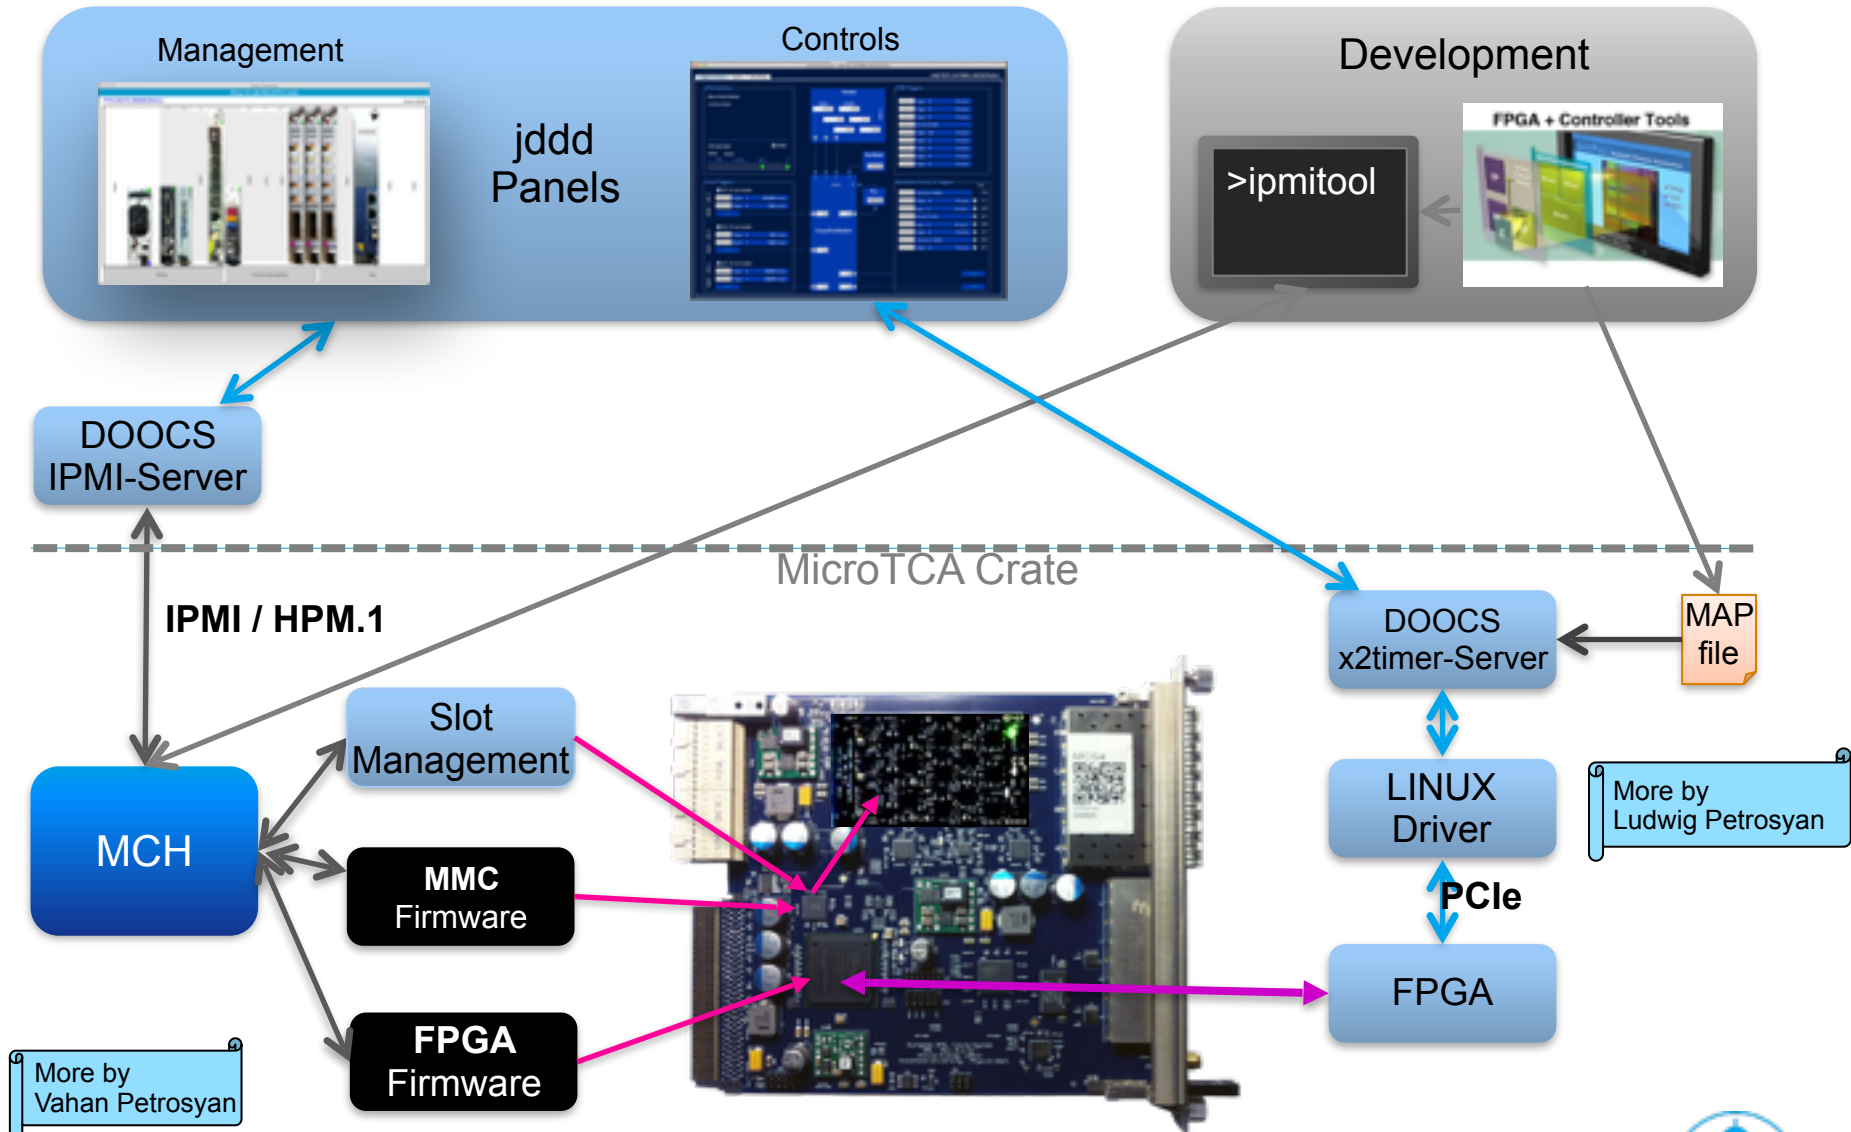

Display by standard controls tool jddd

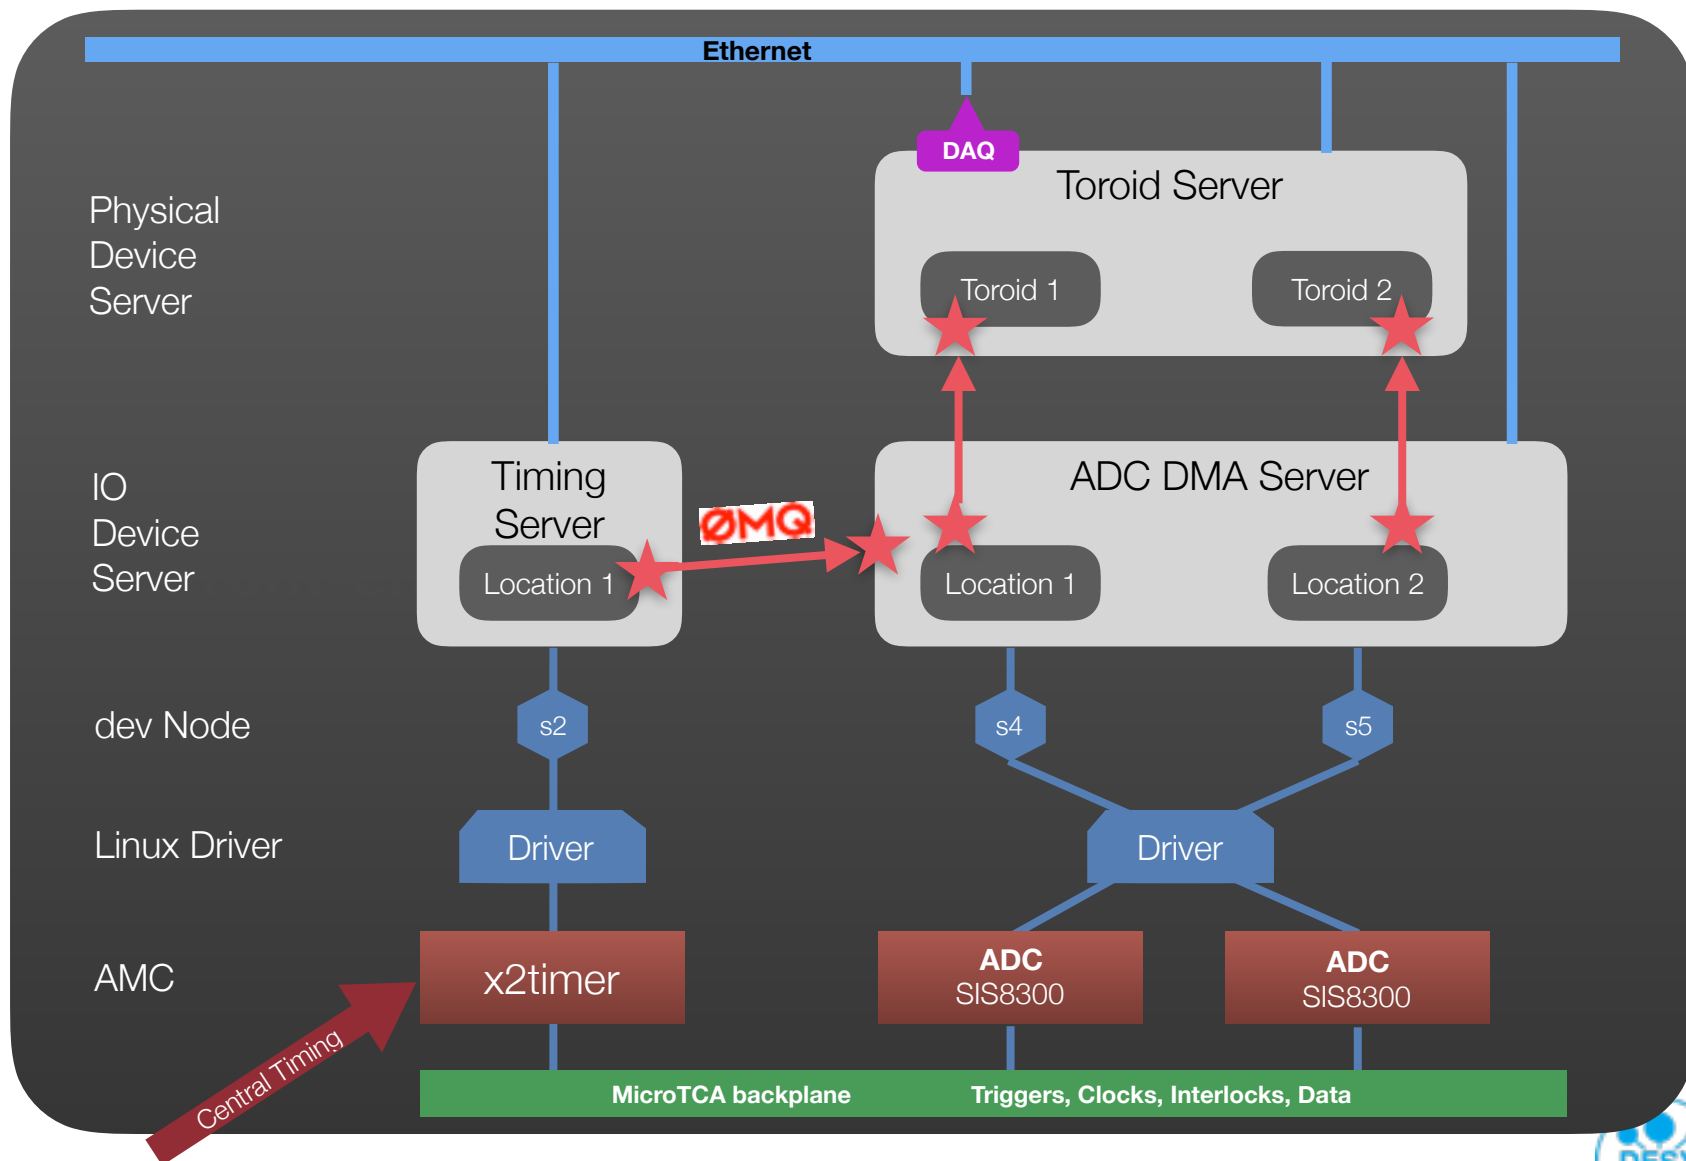

# DOOCS Control System View

# Management, Controls and Development Interfaces

# Fast Data Processing from MicroTCA to Server

# Conclusions

## > Status

- > 50% of the cryo modules are installed
- 20% of the MicroTCA crates are in operation
- All mission critical MicroTCA modules are in operation
- Software and installation procedure are in operation
- **FLASH**: 20 MicroTCA operate 24/7
  - upgrade of the remaining ~50 VME crates planned

## > Next steps

- Operation of the Gun and XFEL Injector just started
- 2016: operation of XFEL
