

On the physical realization of Seiberg dual phases in branes at singularities

Wednesday 24 February 2016 17:15 (15 minutes)

Branes located at (toric) singularities may give rise to several quiver gauge theories related by Seiberg duality. Our goal is to study where in the Kähler moduli space each of them is being physically realized.

Presenter: BERASALUCE-GONZALEZ, Mikel (Mainz U.)
