## Announcements

./.

## Report from the Management Board

Dortmund University was welcome as a new participant in the accelerator field of the Alliance (S Khan).

The Management Board took note of the developments in Dortmund and Heidelberg for possibly stronger engagement in the accelerator field. Such developments are fully aligned with the goals of the Alliance and are welcome. Before attempting to fund these new activities detailed proposals should be worked out. The direct relevance for the Terascale must become visible.

## Preparation of Annual Meeting

The preferred time for the parallel session is the afternoon, starting 14:00.

There will be topical presentations in the accelerator session followed by a discussion of the developments in Frankfurt (Meeting of representatives of German Universities interested in Accelerators, 17./18.10.2008) and further developments that could strengthen the field.

The presentations currently foreseen are:

- Sebastian Aderhold (DESY) "Optical Inspection for High Gradient SRF Cavities" (30')
- Marc Wenskat (Göttingen): "RF Controls for High Gradient SRF Cavities" (20')
- Jürgen Wittschen (Bonn): "Precision Compton Polarimetry using a counting silicon microstrip detector" (30')
- Benjamin Bornmann (Wuppertal): "Photoenhanced field emission for high-brightness electron sources" (30')
- Shaukat Khan (Dortmund) "Presentation of the Dortmund Accelerator Activities" (20')
- Discussion: Developments in Terascale Accelerator Research in Germany

Some 25 people are expected for the parallel session.

## Next Meeting

Tuesday November 11, 2008, 14:00, tentatively.
