## Synchrotron radiation beam diagnostics at BINP

*Wednesday 24 August 2016 11:20 (20 minutes)*

Synchrotron radiation is widely used at BINP colliders for e+e- beams parameters measurement. Progress and results of optical diagnostic tooling are discussed including new-generation dissector with picosecond resolution.

**Authors:** Prof. MESHKOV, Oleg (Budker Institute of Nuclear Physics (BINP)); DOROKHOV, Viktor (Budker Institute of Nuclear Physics (BINP))

**Presenter:** DOROKHOV, Viktor (Budker Institute of Nuclear Physics (BINP))

**Session Classification:** Young Scientists' Forum

**Track Classification:** Accelerator design and technologies
