

Funding Research Data Management and related Infrastructures

Wednesday 5 October 2016 11:00 (30 minutes)

Funding and policy formulation among Research Funding Organisations (RFOs) and Research Performing Organisations (RPOs) with respect to Research Data Management and Access to Research Data is an ongoing concern. It is taking place at different paces among countries and organisations, and is part of funding RD related infrastructures. In 2016 Knowledge Exchange and Science Europe published a briefing paper based on analysis of a survey on current practice and views in European RFOs and RPOs –main questions: where does the funding come from, how is the funding organised, what are the challenges.

Results, conclusions and recommendations will be presented.

Presenter: CORDEWENER, Bas (Knowledge Exchange)
