

## GeRDI - Generic Research Data Infrastructures

*Thursday 6 October 2016 11:00 (20 minutes)*

The new ~3 million Euro DFG project GeRDI (Generic Research Data Infrastructure) aims at building and connecting research data management systems. The project involves significant efforts in the areas of requirement analysis, implementation, pilot operation, and sustainability. Germany-wide scientists will be enabled to store, search for, and re-use cross-disciplinary research data.
