

xTCA relative development at IHEP Beijing

Wednesday 7 December 2016 11:45 (15 minutes)

As a founding member of “xTCA for Physics”, IHEP has long been in the research and development of electronics in ATCA/MTCA/AMC framework. The presentation will cover some of the developments with some applications, like in PANDA, Belle II and CMS experiment, as examples. Some design details and test results will be given. Also some design ideas of current design for future experiment will also described.
