

New SP Devices MTCA Digitizers designed for fast electronics applications in Physics

Wednesday 7 December 2016 16:30 (15 minutes)

- SP Devices introduces new ultra-fast digitizing solutions with embedded processing in MTCA form factor for demanding applications such as high speed diagnostics in physics.
- SP Devices continues to improve current products offering by developing new clock and trigger synchronisation capabilities over the MTCA backplane.

Primary author: Mr WEBER, Laurent (Signal Processing Devices AB)

Presenter: Mr WEBER, Laurent (Signal Processing Devices AB)

Session Classification: Session 4

Track Classification: New products and developments
