

# The Future of Neutrino Physics

A German Perspective on Topics, Opportunities and Challenges

## Thursday 23 February 2017

**Chair: G. Anton - MPIK Main Lecture Hall (12:30 - 14:05)**

| time  | [id] title                                                                                  | presenter          |
|-------|---------------------------------------------------------------------------------------------|--------------------|
| 12:30 | [0] Welcome                                                                                 | LINDNER, Manfred   |
| 12:35 | [1] Theoretical overview: The value of topics (35+10)                                       | RODEJOHANN, Werner |
| 13:20 | [2] Oscillations: Mixing parameters, mass hierarchy, and CP violation - experiments (35+10) | STAHL, Achim       |
