Data Systems Overview

A typical use case:

Karabo Concept

- Event driven control
- Interactive Control and monitoring
 - direct interface to Beckhoff PLCs
 - full access to Doocs servers
 - communication with EPICS IOCs and Tango servers
- Slow and fast data flow (TCP/IP and shared memory)
 - Central Broker communication
 - point-to-point data pipelines
- Online data analysis
 - identical to offline data types
- C++ framework with Python devices
