for programme, registration (will open soon) and other details see
<https://indico.desy.de/conferenceDisplay.py?confId=1978>

Statistics Tools Group - some points for discussion

Meetings:

plan (since long) to have a regular statistics tools group meeting at least once per months *lets do it!*

Big educational seminars (on what?) or rather discussion forums on concrete tools projects.. or both? *Ok, lets get started*

Informal meetings (every third thursday in the month at 10h00 in sem 3a) - *successful start in winter, need to take up again.. are minutes on the web needed/useful at all?*

User support:

For the whole analysis centre: can/should we finally open a hypernews or wiki discussion forum? -> would allow to better channel questions.. *so far this project has only been half-heartedly pushed & followed by anybody and wiki open discussion forum are just filled with spam emails*
