SP12: Fault Diagnosis for the XFEL: Possibilities and Challenges

Friday, July 21, 2017 11:33 AM (3 minutes)

Fault Diagnosis plays a large role for automating systems and making their operation safer and more reliable. From airplanes to cars to big industrial plants, fault diagnosis methods are applied to lessen downtime and predict maintenance as well as to avoid unnecessary failures. This poster discusses the challenges and possibilities to make use of an automatic fault diagnosis system for the XFEL.
