Rivet discussion summary

- Long and detailed technical and physics introduction to Rivet
- Technical discussion on:
    - Application of user defined changes to reconstruction
      methods on physics analysis
      (this would mean to implement a new Rivet analysis)
    - Histogramming and aida->root conversion
      (histogramming will be changed to YODA package)
    - Atlas interface implementation and problems

- Physics discussion on:
    - which parameters should be tuned
    - influence of data sample on parameter optimisation
