Reboots

- WGS and batch ... done so far

CVMFS UI

- Still issues?

DUST status

- 2017-05-04: NFS server split between WGS and BATCH
 - 2x proxies dedicated for interactive workload and 4x for batch workload
 - Solved performance issues caused by saturated network from batch jobs (~10GB/s)
- Split caused increased error rates for batch jobs
 - Input/output errors
 - Investigating possible network issues together with IBM
 - dropped packets and TCP retransmissions

DUST Network last 7 days
