Workshop using the Naf

Overview

> No problems from our site

> Feedback seems to be positive

After-work

> The additional INs from the workshop are changed to SL5-INs

> One for each VO for testing SL5 without pnfs mount

> This is the next step to help the experiments to test SL5

Software News

> SL4.8 Beta is in testing
> Problems found with Lustre/IB and the last kernelupdate $\Rightarrow$ no solution up to now
  - but new security update can't be installed till this is fixed
> Three login-VM host crashes
  - the crash means loosing all sessions, but host recovers from alone
  - it might be a known, not solved Red Hat bug
  - we think we know how to trigger it/ avoid it

Announcements

> pnfs mount will be disabled in August
> Subversion 1.4 update for SL4 is in the queue
> autoproxy is in final version

Tickets to naf-helpdesk and naf

26/18 Tickets to Naf helpdesk/Naf

Lustre 10/3

login/accounts 7/2

afs 0/3

dc-tools 2/0

naf token 1/1

Backup 1/1

mails/mailinglist 0/2

SL5 1/0

Naf slow 1/0

other 3/6

Waiting jobs per project
