A few Computing Items

DESY CMS Meeting February 18th 2009

Christoph Wissing

General Computing Activities

- ◆ **Presently no dedicated challenge**

- ◆ **Do the "real" thing instead**
  - • **Re-Reco of CRAFT data**
  - • **Continues MC production**
  - • **Challenging enough**
    - ‒ Production teams fight agains WMS (Workload Management System)
    - ‒ Often overloaded SRMs mostly at Tier-1 sites (SRM: entry service to storage system)

- ◆ **More CMS users doing Grid based analysis**
  - • **Analysis Support task force**
    - ‒ Look at user profiles and site performances
    - ‒ Try to improve monitoring tools and support structures

D-CMS Computing

FSP-CMS Computing Experts Group

Members:

- Aachen:

  Carsten Hof, Thomas Kress

- DESY:

  Birgit Lewendel, Christoph Wissing

- Hamburg:

  Christian Sander, Hartmut Stadie(chair for 2009)

- Karlsruhe:
  Günter Quast, Klaus Rabbertz, Volker Büge

Meetings:

- discuss computing decisions for FSP-CMS regarding:
  - resources
  - manpower
- telephone conferences roughly once per month

D-CMS: Storage Discussion

Storage Resources for FSP-CMS

Available storage resources:

- local storage at Tier-2 at DESY
- local storage at Tier-2 at Aachen
- NAF storage for CMS
- D-Grid resources at Aachen
- D-Grid resources at GridKa (tape to archive user data?)

Tier-2 Storage

- Temp Space — Transient Space while merging. Less than 1TB for a nominal T2
- User Space — 0.5-1TB per user
- Local Space — ~30-60TB at a nominal Tier-2
- Analysis Space — ~60-90TB at a nominal Tier-2
- Central Space — 30TB per Tier-2
- MC Space — ~20TB at a nominal Tier-2. (10% of storage resources)
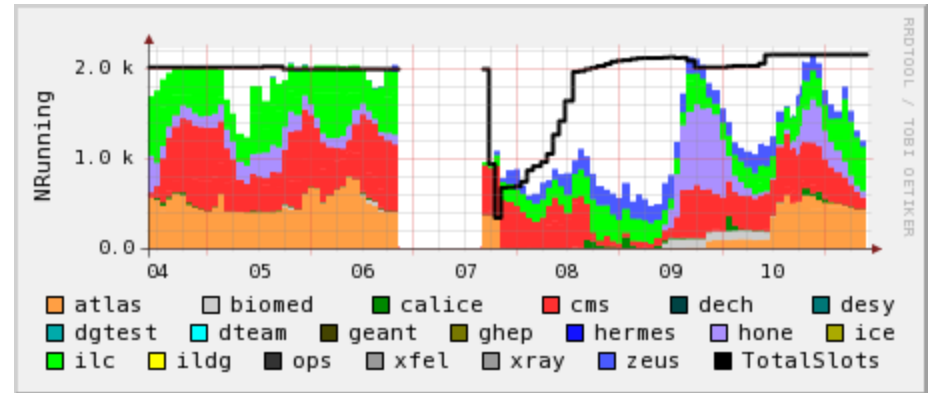

200TB Nominal Tier-2

CMS storage types

- official datasets(/store/mc, /store/data)
- user (scratch) space (/store/user)
- user data sets (/store/results) (under development)

February, 2009   Christoph Wissing - DESY   4

DESY related Items

◆ CPU almost doubled in December

- **Now ~2200 cores**
- **Good usage (by CMS)**

◆ Quite some data imported

- **Data sets from "DESY"-groups**

◆ Downtime this week

- **Upgrade of Storage Element (Software)**
- **Various maintenances**
