

Single Cavity and Piezo Controls and Applications

Thursday 7 December 2017 09:35 (15 minutes)

We want to summarize single cavity and piezo control activities started in 2015. The MTCA.4 based hardware components (AMC-RTM) have been setup for different applications and setups and used for fast or slow feedbacks. A dedicated software blocks have been applied for easy access and diagnostics of the digital signal processing units. The possible applications are presented and briefly discussed.

Primary author: Dr PRZYGODA, Konrad (DESY)

Co-authors: Mr GUMUS, Cagil (DESY); Dr SCHMIDT, Christian (DESY); Dr HIERHOLZER, Martin Christoph (DESY); Dr ECHEVARRIA FERNANDEZ, Pablo (HZB); Dr RADOSLAW, Rybaniec (DESY)

Presenter: Dr PRZYGODA, Konrad (DESY)

Session Classification: Session 5

Track Classification: Application in research facilities and industry
