

## Results from the First Tritium campaign of KATRIN

Florian Heizmann, Alexander Marsteller for the KATRIN collaboration

spectrum linearised over a wide energy range

- no unexpected features in the data
- region around the endpoint shows good agreement with models
- data with design injection stability is taken this week
- systematics will be addressed in autumn this year
- statistics will be addressed in runs with increased tritium purity

good agreement between model and data

We acknowledge the support of Helmholtz Association (HGF), Ministry for Education and Research BMBF (05A17PM3, 05A17VK2, and 05A17WO3), Helmholtz Alliance for Astroparticle Physics (HAP), and Helmholtz Young Investigator Group (VH-NG-1055) in Germany; Ministry of Education, Youth and Sport (CANAM-LM2011019), cooperation with the JINR Dubna (3+3 grants) 2017–2019 in the Czech Republic; and the Department of Energy through grants DE-FG02-97ER41020, DE-FG02-94ER40818, DE-SC0004036, DE-FG02-97ER41033, DE-FG02-97ER41041, DE-AC02-05CH11231, and DE-SC0011091 in the United States.
