

dCache

Storage of the Future

dCache in the LHC Grid

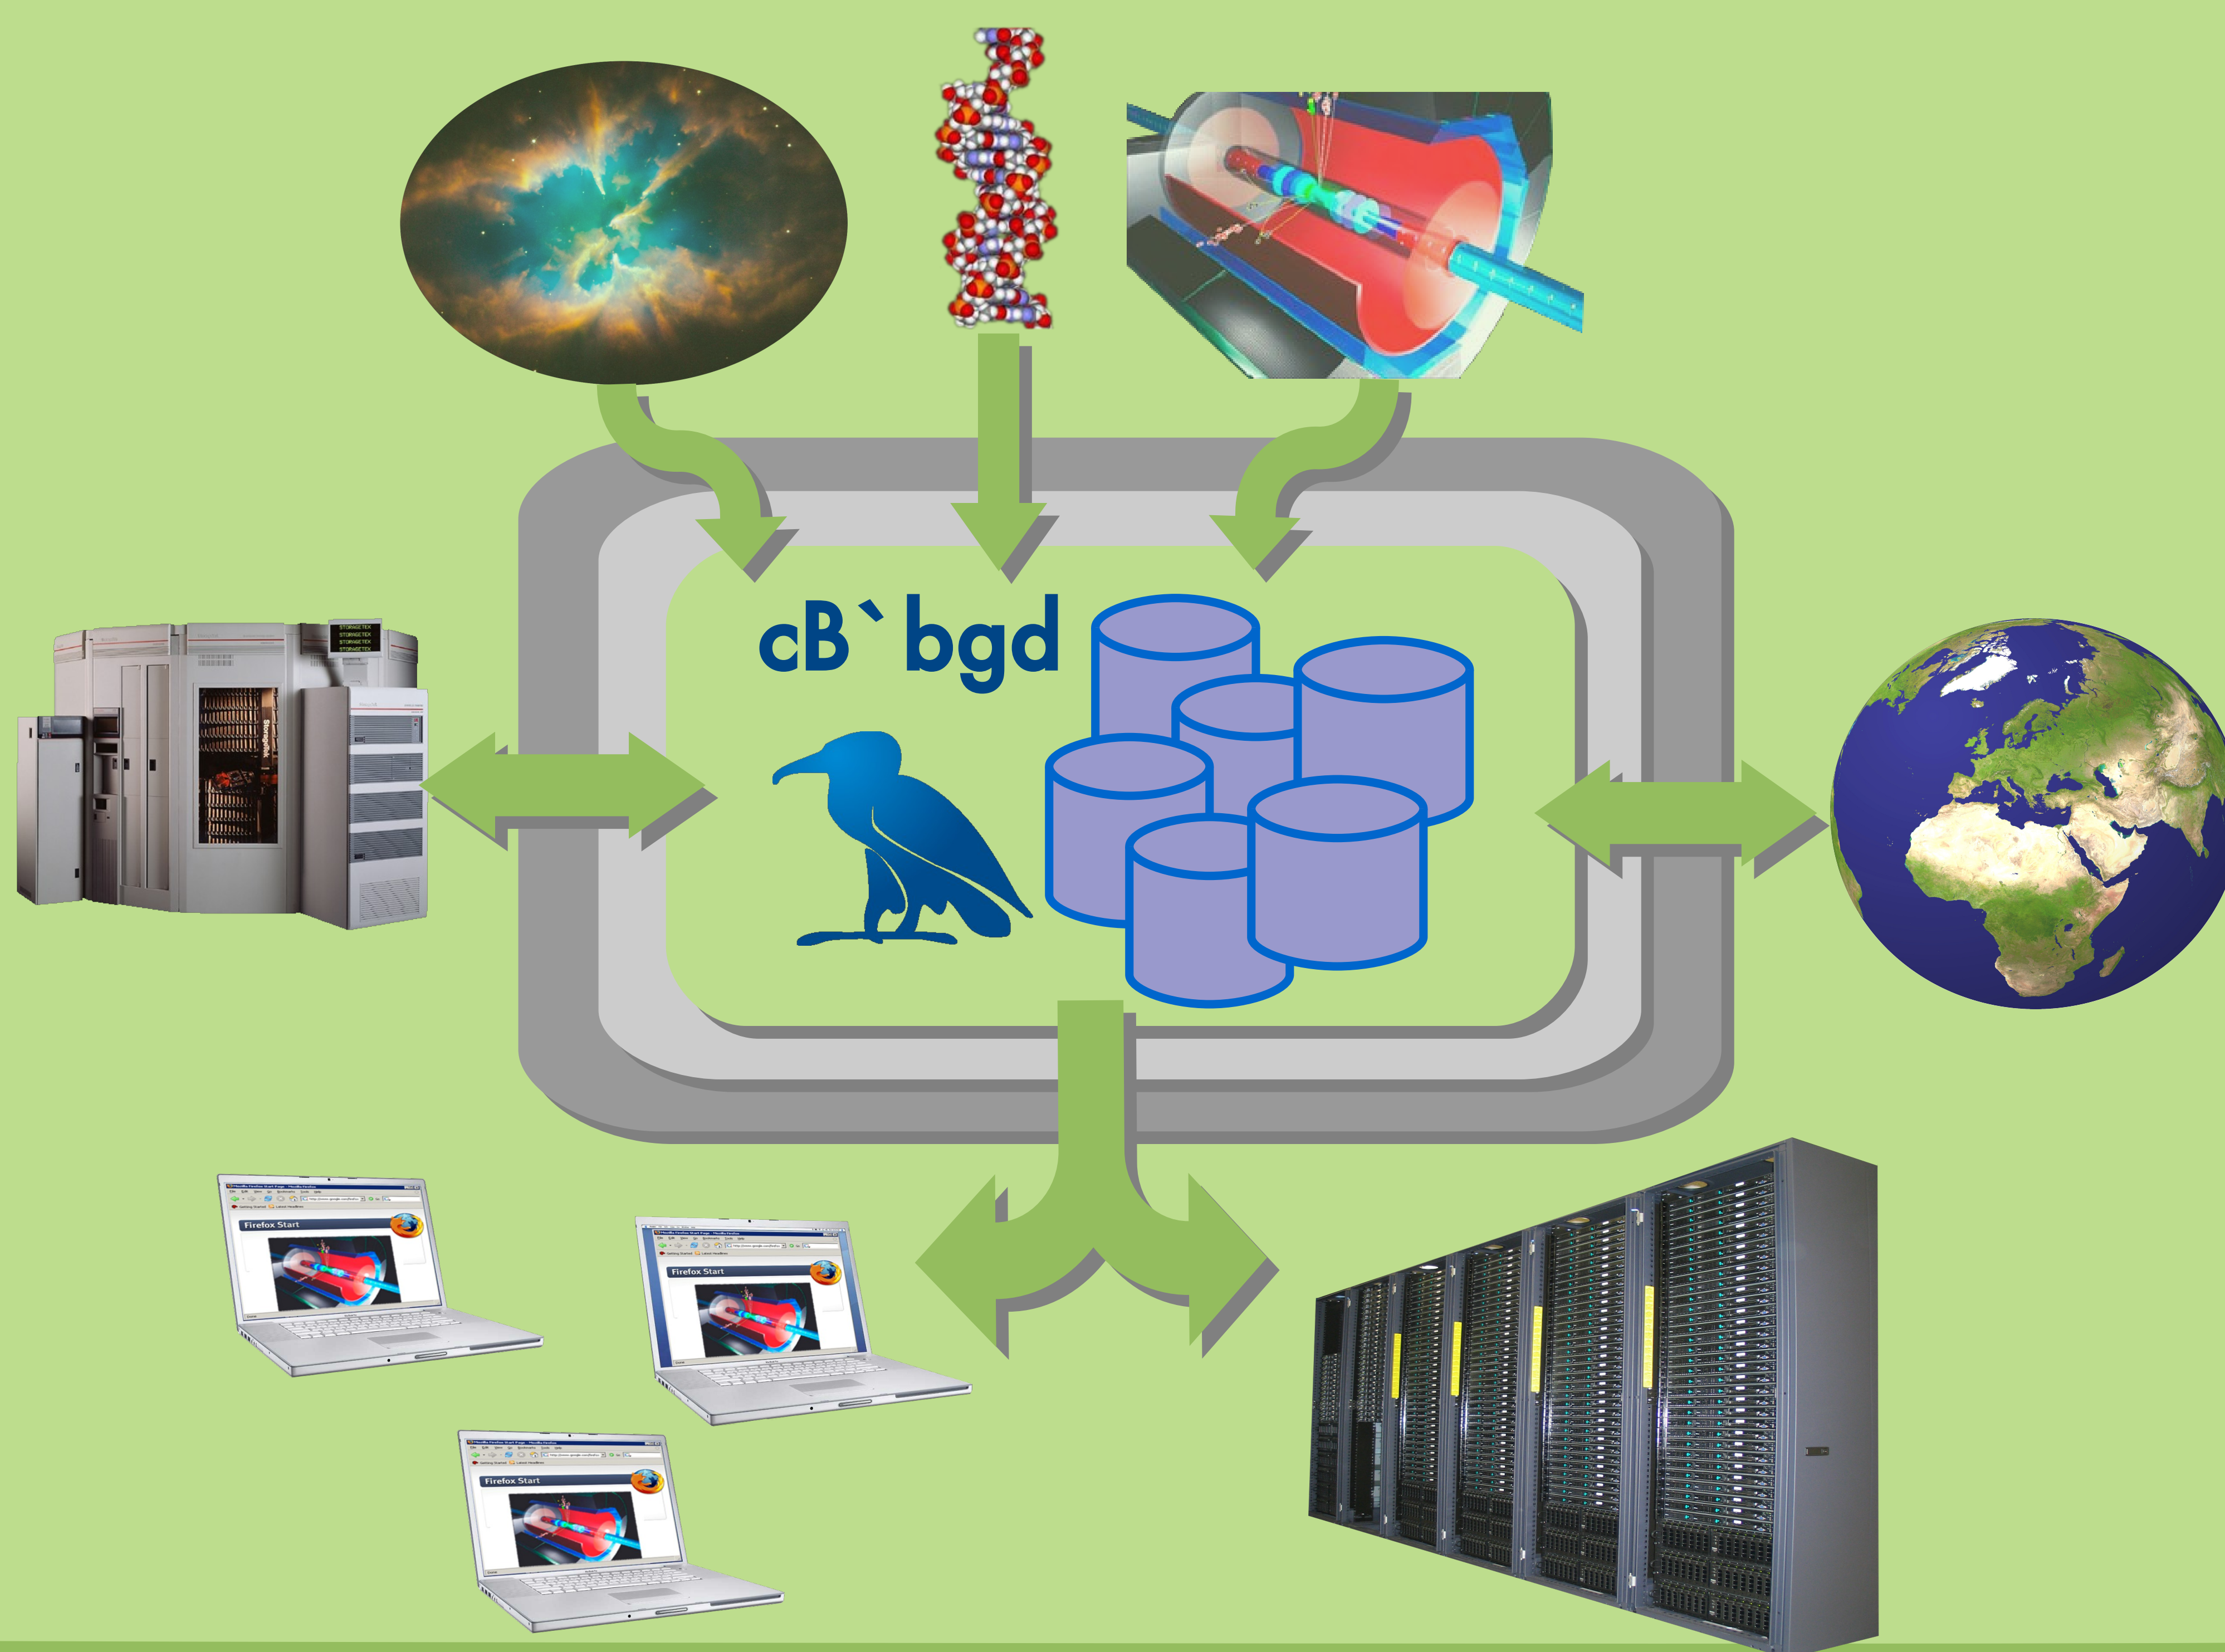

dCache will hold the largest share of LHC Data

key highlights

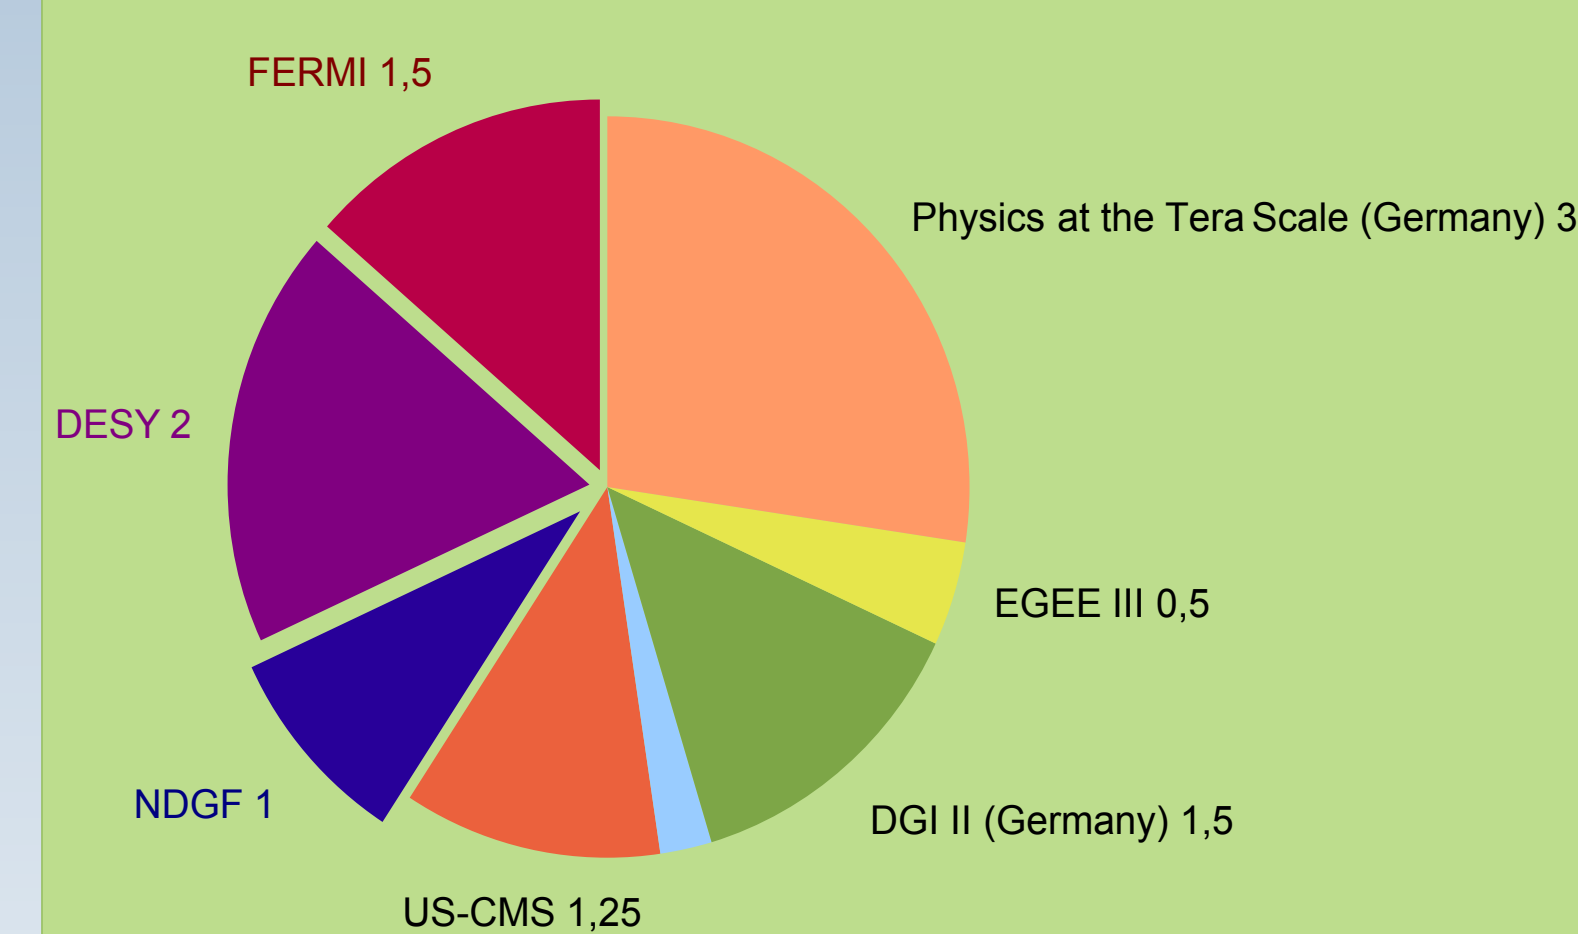

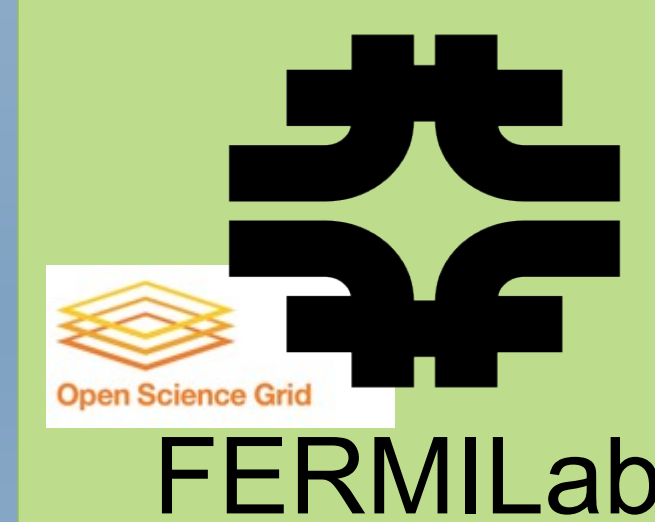

- Manages huge amount of data !
- Single dCache instances already manage multiple Peta Bytes of disk storage and several 10 millions of files.
- Scales across countries !
- The NDGF installation spans 5 countries.
- Industry standard access protocols!
- Nfs4.1 and http, as well as all LCG Grid standards.
- Tape back-end connectivity!
- dCache supports a large variety of tape systems, including TSM® and HPSS®

dCache, fits all sizes

dCache in Vivo
