

# 5th International Solar Neutrino Conference

## Thursday 14 June 2018

### Solar Temperature Measurements and Neutrino Detection - Dülfer Saal (14:30 - 16:00)

-Conveners: Zhe Wang

| time  | [id] title                                                                                        | presenter                |
|-------|---------------------------------------------------------------------------------------------------|--------------------------|
| 14:30 | [49] Using neutrino lines for solar temperature measurements                                      | Prof. PENA-GARAY, Carlos |
| 15:00 | [6] Jinping, and the solar neutrinos                                                              | Ms WAN, Linyan           |
| 15:15 | [24] Limits on neutrino magnetic moments from the spectral analysis of the Borexino Phase-II data | Mrs VISHNEVA, Alina      |
| 15:30 | [28] Filling the gap: the solar neutrino flux at keV energies                                     | Mr VITAGLIANO, Edoardo   |
| 15:45 | [38] Solar neutrino spectroscopy with thermal detectors                                           | Dr CANONICA, Lucia       |
