

Meeting of Project Board Accelerator

31.3.2009, 10:00-11:00, Phone Conference

Present: I. Brock, E. Elsen, W. Hillert, S. Khan, G. Müller

Announcements	2
Report from the Management Board	2
Preparation of Annual Meeting	2
Next Meeting	3

Announcements

The HGF-midterm evaluation is foreseen for 30.11.-1.12.09 or 14.-15.12.09 in Berlin. The scope of the evaluation will be defined in a meeting in Berlin in summer.

The Alliance Annual Workshop will take place 11.-13.11.09 at DESY.

A regular newsletter is being issued by the Alliance and can be obtained from http://www.terascale.de/news/alliance_newsletter/.

There is no public news on the bmbf-Verbundforschung proposals for the accelerator field.

Report from the Management Board

The YIG accelerator position at the University of Hamburg will have to be filled soon. The funds are available. An advertisement is with the University and is ready for publication. I Brock stresses the practice from previous such openings where the Alliance provided representatives to the selection board.

Accelerator School

The 2nd Terascale Accelerator School is to take place at Universitätskolleg Bommerholz (near Dortmund) in the week 7.-11.9.2009. The time slot has been reserved. The full board cost is ~75€/d and includes the lecture room and facilities. More information on the site can be obtained from the web-page: <http://www.tu-dortmund.de/bomholz/>. S. Khan will contact the Kolleg for more details.

The programme will again address students at the introductory level. Financial support will be available to selected students upon request.

The tentative programme could be scheduled as below:

	07.09.2009	08.09.2009	09.09.2009	10.09.2009	11.09.2009
morning	<i>Travel</i>	Basics	LHC	SRF	Linear Collider
		LHC	SRF	Linear Collider	New concepts
afternoon	Basics	Exercises	Exercises	Exercises	<i>Travel</i>
	Synchrotron-radiation, FEL		Excursion		

External speakers would be sought for LHC and for the "New concepts." An excursion would go to an accelerator nearby the venue, most likely Dortmund.

CERN organises a school at "Intermediate Level", Sep 28-Oct 9, 2009, <http://cas.web.cern.ch/cas/CAS-Prog-2009.html>. Care has to be taken to avoid too much overlap. The hands-on aspect of the Terascale Accelerator School must be emphasised.

Annual Report

The Annual report is due 30.4.2009. The key "performance" figures are to be supplied now to the institutes' representatives. The elements of the scientific progress report are to be written now. They will be collected by E Elsen and cast into a unified form. The report of the board will then be forwarded to I Brock.

Next Meeting

Not yet fixed. Interaction for the Annual Report predominantly by email.
