

The status of supersymmetry by GAMBIT

Friday 22 June 2018 10:35 (20 minutes)

Is supersymmetry losing ground as a compelling extension of the Standard Model? Or is there still enough experimental evidence to support our faith in it? In search of quantitative answers, I review the latest GAMBIT results for various supersymmetric models covering the CMSSM, NUHM1 and 2, MSSM7 and MSSM9.
