

Topological Insulators as Axion Laboratories

Monday 18 June 2018 11:50 (20 minutes)

t.b.a.

Summary

We report on a new idea for axion dark matter detection in the 0.1 to 10 meV range using the axion-photon coupling.

Primary authors: Dr MARSH, David (University of Goettingen); Mr LENTZ, Erik (University of Washington); Dr ALL, Mazhar (Max Planck Institute for Microstructure Physics)

Co-authors: Dr WEBER, Chris (Santa Clara University); Dr FONG, Kin-Chun (Harvard University); Mr SMEJKAL, Libor (University of Mainz)

Presenter: Dr MARSH, David (University of Goettingen)

Session Classification: Plenary presentation
