Phase 2 readiness report

- Thomas H. wrote: we plan to have a meeting on Phase 2 collision readiness in the next software meeting on the 22.3. I would like to ask you to give a report of the readiness of tracking for phase 2. In specific, this is of interest:

  - first insights and learnings with phase 2 cosmics

  - tracking performance with the phase 2 geometry

  - the most recent runtime and memory consumption numbers

  - if all the required db payloads (SectorMaps, MVA training) are correctly uploaded to the conditions db for phase 2 (MC uses exp number 1002, data uses exp number 1 - 5)
