Hector Betancourt - The MTCA Configurator tool

Wednesday 5 December 2018 12:00 (15 minutes)

The MTCA Techlab configurator is a powerful, but easy tool for users without previous experience, where users can create their system according to the needs required for their projects. With this tool users can select from chassis, CPU, power Supply and a wide variety of mezzanine cards for different applications. This presentation will show how the principle of the configurator works.
