

Jan Marjanovic - MicroTCA Technology Lab at DESY: Summary of 1st Year Operations

Wednesday 5 December 2018 14:45 (15 minutes)

The MicroTCA Technology Lab (A Helmholtz Innovation Lab) at DESY officially opened in April this year. The Lab provides an “enabling space” for a wide spectrum of interactions with industry, with a particular focus on client relationships around:

- New developments in MicroTCA.4 (hardware, firmware, software),
- High- end test and measurement services,
- Consulting and system integration projects.

We report on completed and ongoing projects, highlight intermediate development results and provide an outlook for the coming years.

Author: Dr WALTER, Thomas (DESY)

Session Classification: Session 3
