

Günther Rehm - First projects at Diamond Light Source involving MTCA

Wednesday 5 December 2018 17:15 (15 minutes)

Diamond Light Source has used VME extensively in the past. However, it is becoming increasingly costly to maintain so for more recent developments in need of a high performance framework we have increasingly chosen MTCA. This talk will give a brief overview of the projects we have completed or are currently working on: Low Level RF control, bunch-by-bunch feedback, source feedback from X-rays at sample, and future orbit feedback controller.

Primary author: Dr GUENTHER, Rehm (Diamond Light Source)

Co-authors: Mr BLOOMER, Chris (Diamond Light Source); Dr ABBOTT, Michael (Diamond Light Source); Dr GU, Pengda (Diamond Light Source)

Session Classification: Session 4
