

## Martin Tolkiehn - MTCA in photon science

*Wednesday 5 December 2018 17:30 (15 minutes)*

Although the MTCA standard is well established for accelerator control systems, the control systems of most X-ray beamlines still rely on the outdated VME standard. I will present how this could be changed in the near future using existing and planned MTCA hardware and I will show some examples from beamline P24 at PETRA III.

**Primary author:** Mr TOLKIEHN, Martin (DESY)

**Session Classification:** Session 4
