

# DPG Rehearsals

## Wednesday 20 March 2019

### 2/2 Session - Sem Room 1d (15:00 - 18:00)

| time  | [id] title                                                                                   | presenter                |
|-------|----------------------------------------------------------------------------------------------|--------------------------|
| 15:00 | [6] Probing anomalous quartic gauge couplings at the International Linear Collider           | Mr BEYER, Jakob          |
| 15:30 | [5] ROPPERI - A TPC readout with GEMs, pads and Timepix                                      | EINHAUS, Ulrich          |
| 16:00 | Coffee Break                                                                                 |                          |
| 16:15 | [8] Reconstruction of heavy flavour jets for Higgs physics at future e+e- colliders          | Mr RADKHORRAMI, Yasser   |
| 16:45 | [4] The LYCORIS Large Area Strip Telescope                                                   | Mr KRÄMER, Uwe           |
| 17:15 | [10] Particle identification methods for the CALICE highly granular SiPM-on tile calorimeter | Mr BOCHARNIKOV, Vladimir |
