

Offline Software Coordination at DESY CMS: QuickUsersGuide twiki

Maria Aldaya

DESY-CMS Meeting, 19-10-2009

HamburgAnalysis QuickUsersGuide

- **Motivation:** Feedback from the different physics groups at DESY concerning the status of procedures and setups for their analysis (special thanks to Roberval and Dima for valuable input)

Where (computing sites) are the analyses run and how (specific resources, configs...) ?

- **HamburgAnalysis QuickUsersGuide:** “Quick User’s Guide” with updated brief instructions for any CMS analysis at DESY and UniHH

<https://twiki.cern.ch/twiki/bin/view/CMS/HamburgAnalysisQuickUsersGuide>

✓ Contains **general recipes** for analysis, organized in dedicated sections:

- Local computing and CMS software issues
- Grid computing, including the use of CRAB
- Analysis on the NAF, making special emphasis on:
 - Recommended working space
 - Recommended use of the available storage areas
 - Use of the local batch system, with and without CRAB

✗ Does **not** contain: detailed explanations (refer to links therein), specific analysis info, development/instal. info

Comments/suggestions welcome!
