# Unit tests

The image shows two windows of a code editor. The top window, titled 'footer.php', contains PHP code for processing a page layout. The bottom window, titled 'header.php', shows the beginning of a PHP file with ob\_start() and a closing tag. The code in both windows is being cleaned up, with some lines being highlighted or removed.

```
47 }
48
49 $f = file_get_contents(DUO_BASE . "w3/layout.html");
50 $f = $pageContext->substituteMarkers($f);
51 $f = str_replace("###ACCOUNT###", $acc, $f);
52 $f = str_replace("###LOGINOUT###", $loginout, $f);
53
54 echo str_replace("###BODY###", $page, $f);
55 exit;
```

```
1 <?PHP
2 ob_start();
3 ?>
4
```

```
