

## “Good Scientific Practice”

May 7, 2020, 9 a.m. – 3.00 p.m.

Dear Participant,

We look forward to welcoming you to the course “Good Scientific Practice”. Language will be English, the course is live online! This Live Online Course has been designed to develop both personal and research effectiveness. Our aim throughout will be to maximize the relevance of the course to the needs of a researcher.

**General introduction and technical preparation:** Please have a look on our [website](#).

**Technical preparation:** You need a computer with camera and microphone (access granted by Windows/OS). Check camera and mic one day before. The communication platform is called ZOOM and the client program can be installed from

<https://us02web.zoom.us/j/87182726418?pwd=RIlpdFRYb1NzcTlaV1o2VE5jMHVDdz09>

) The same link will be used to login into our online session (**Password: 009709**). We start at 9 a.m. to help you with technical questions.

**Contribution:** The sessions will be highly participative and influenced by your contributions. So, please spend some time **reflecting on your current challenges** and come prepared to share these together with your thoughts, feelings and insights as we move through the program. The more you contribute, the more you will gain from the course! Please try to obtain a laidback perspective especially when dealing with interaction online. Everything is going slower, but we try to make it more focused!

Please bring also paper and pens, colored pencils. Drinks and snacks are also welcome. There will be also enough breaks for compensation. The actual amount of time in front of the computer is max. 4 hours per day.

**Photographs:** Throughout the course, various recording (photographs and videos) may be taken of the activities and sessions. The recordings are for internal use only. If you are, however, uncomfortable with this then please let us know.

We look forward to spending productive days with you.
