

DESY Virtual Theory Forum 2020

Tuesday, 22 September 2020 - Friday, 25 September 2020

DESY Hamburg

Scientific Programme

Cosmology & Astroparticle Physics

Overview talks:

Recent ideas for dark matter detection: Yonit Hochberg (Jerusalem),

New ideas from the neutrino sector: Mariam Tortola (Valencia),

Latest developments in gravitational waves from early universe cosmology: Daniel Figueroa (Valencia)

Particle Phenomenology

Overview talks: SM: Lorenzo Tancredi (Oxford),
BSM: Stefania Gori (UCSC),
DM: Stefan Vogl (TUM)

Strings & Mathematical Physics

Overview talk: Livia Ferro (LMU)
