Overview of WLCG Grid Services Monitoring Working Group

Thursday 26 April 2007 11:45 (30 minutes)

This talk will summarise the work and experience to date of
the WLCG Grid Services
Monitoring Working Group whose goal is, through better
service monitoring, to improve
the reliability and availability of the Grid. The talk will
cover proposed
standardizations for service metric gathering and grid
monitoring data exchange and
the use of a Nagios-based prototype deployment for validation.
