

Tuesday, 31st March 2020, 13:00
Via Zoom

Prof. Paolo Giubellino,
Scientific Managing Director GSI and FAIR
and
Jörg Blaurock,
Technical Managing Director

**GSI, Helmholtzzentrum für Schwerionenforschung,
Darmstadt**

“GSI and FAIR – Status and Prospects”

FAIR is one of the flagship facilities for basic science in the coming decades and will become operational around 2025. FAIR will open unprecedented research opportunities in hadron and nuclear and atomic physics, nuclear astrophysics as well as materials research, plasma physics and radiation biophysics. FAIR is under construction as an international facility at the campus of the GSI Research Center in Darmstadt, Germany. Some of the experimental detectors and instrumentation are already available and are used since summer 2018 in a dedicated research program. The progress of FAIR realization and the prospects of science at FAIR will be presented.
