

Big things
sometimes come in
small pieces.

Content Multi-Channel Piezo Driver Boards

- Products & Services
- Short introduction of piezo technology
- PRTM-PZDR4 4-channel piezo driver
- Outlook 8-channel boards

Products & Services

- Piezos, Mechanics, and Piezo Electronics
- PZT4 4-Channel Piezodriver for MTCA under licence of DESY

ACTuator – a technology of its own.

The idea of piezo actuators is as **simple** as it is **effective**:

- A piece of piezo material deforms under the influence of electric field .
- It changes its length directly with the applied voltage
- and can run at very high power setting movements of loads.

Vice versa, a piezo generates an electrical voltage under the presence of mechanical pressure

ACTuator – a technology of its own.

Single Piezo Plate $E = 2\text{kV/mm}$

Stacked Piezo Plates $U = 0 \text{ to } +150\text{V}$

Sintered multilayer piezo stack actuator

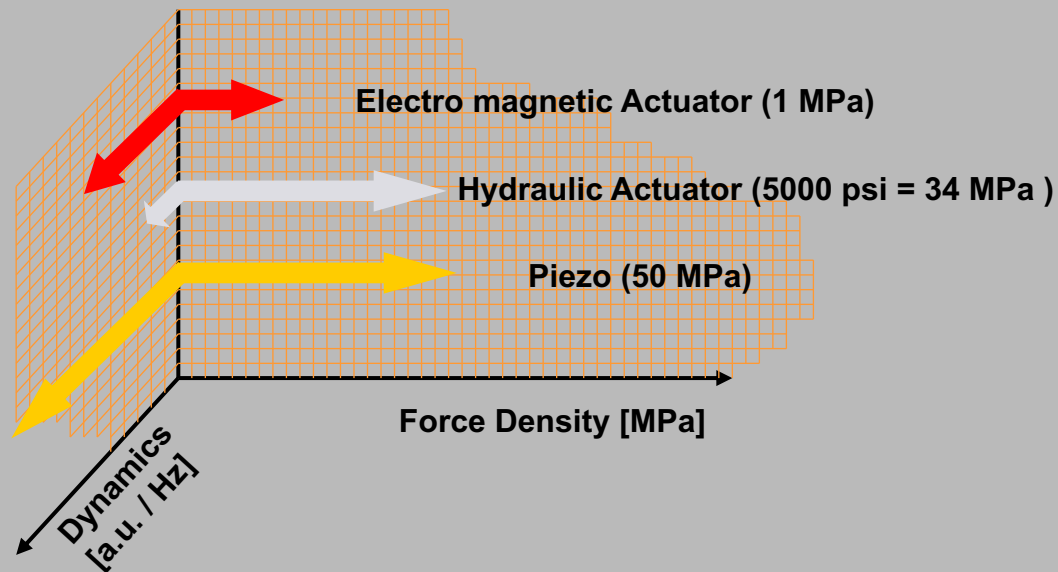

Stack Assembly

ACTuator – a technology of its own.

Pros of Piezo

- **Strong.**
- **Faster.**
- **True.**

Con of Piezos – **small displacement**

PRTM-PZDR4 4-Channel Piezo Driver for MTCA

HIGHLIGHTS

- Supports 4 actuators and sensors
- Unipolar and bipolar operation
- Digital voltage and current readout
- Encapsulated in metal housing
- Internal high-voltage source/ and external high-voltage option

FEATURES

- MicroTCA.4 Rear-Transition Module (RTM)
- Typical bandwidth of 50 kHz with 0.1 μF piezos
- Digital output sampling with 200 kSPS
- Switchable actuator and sensor functionality

OPERATION

- Internal power supply: : ± 80 V, 100 mARMS (sum 4 channels)
- External power supply: : ± 120 V, 500 mARMS (sum channels)
- Interlock signal support via Zone 3 or front panel
- Analog low-voltage monitor outputs on front panel

PRTM-PZDR4 4-Channel Piezo Driver for MTCA

APPLICATIONS

Particle and optical beam control

Particle accelerator: RF Cavity frequency control

Laser optics: Stretcher and switcher for optical fiber

Control, mirror steering,

synchronization of pulsed lasers, fiber link stabilization etc.

INDUSTRIALIZATION

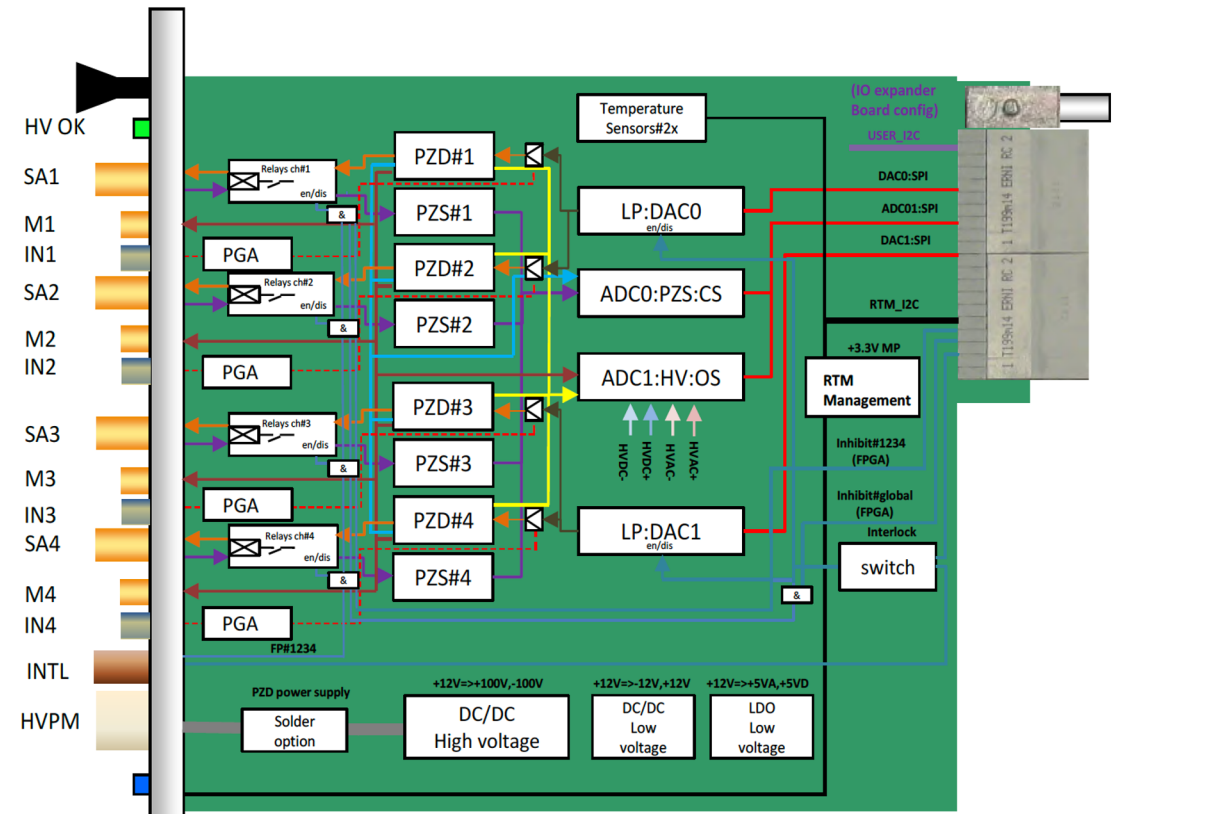

by PIEZOTechnics under licence of DESY

In series production since 2019:

2019 67 pcs.

2020 25 pcs.

FUNCTIONAL BLOCK DIAGRAM

HVDC-(high voltage negative:dc component)
 HVDC+(high voltage positive:dc component)
 HVAC-(high voltage negative:ac component)
 HVAC+(high voltage positive:ac component)

CS (output current sense)
 VS (output voltage sense)
 PZDO (piezo driver output)
 PZS (piezo sensor input)
 DAC output
 external input

LP(programmable analog low pass)
 Relays ch#(Relay ACT/SENS, Relay load disconnection)
 PGA(Programmable gain amplifier with protection)

PRTM-PZDR4 Applications I

Commercial offer of PRTM-PZDR4

- **proven DESY technology**
- **four channels for piezo** (actuators or sensors)
- **fast:** small signal bandwidth 80 kHz (for 1 μ F)

Applications at DESY FLASH/XFEL

- 1.3 GHz Superconducting RF Cavity Tuning
- Laser Cavity Tuning
- Fiber Link Stabilization
- and more

PRTM-PZDR4 Applications II

MTCA.4 based synchronization for the EOD laser

System now fully integrated in 19":

- MTCA.4 system for:
 - Detection and controls:
Struck ADC + downconverter RTM
 - **Piezo driver: MTCA-RTM PZT4**
for fiber stretcher and linear piezo stage
- RF-front-end: temperature stabilized in Special Diagnostics Module chassis (SDM, together with LDDs and laser temperature control)
- Yb fiber laser and amplifier

SmarAct SLC-1730 piezo stepper for coarse tuning

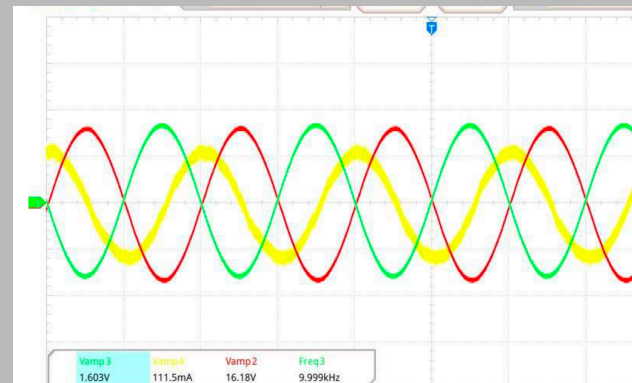

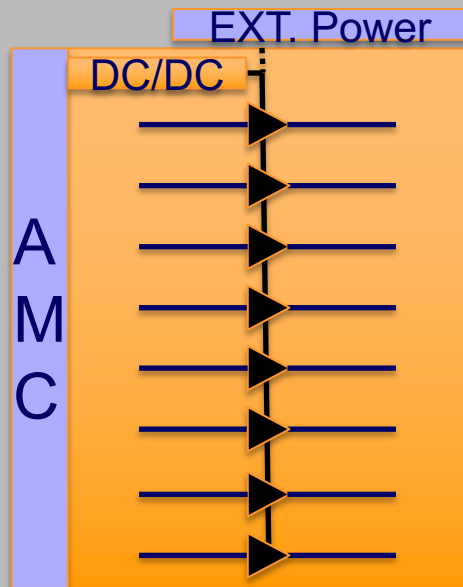

Evanescent Optics fiber stretcher 915B for fast synchronization

Outlook 8-Channel Board under Development

- **SPECIFICATION**

- Standalone or MTCA Crate operation 0-150 or +/-150 V
- Internal (30 W by MMC) or external power supply (150 W)
- Noise figure 20mV RMS
- Small signal bandwidth 100 kHz
- Dimensions 170 x 170 mm²

First Testing at 10 kHz

THANK YOU!

QUESTIONS??
