1

Welcome to my 20 minutes "learn-and-relax" tutorial

Hot topic of today: MCH and power unit

### About N.A.T. – who we are

- Gesellschaft für **N**etzwerk- und **A**utomatisierungs-**T**echnologie mit beschränkter Haftung => **N.A.T.**
- proud to provide quality "made in Germany"
  - since more than 30 years by 25 highly professional employees
- privately owned and owner lead business
- own purpose-built building of more than 1,600m<sup>2</sup> (17,222ft<sup>2</sup>) with on-site centers for
  - hardware and software design
  - pre-manufacturing and test + repair
- ISO 9001:2015 certified

### Agenda

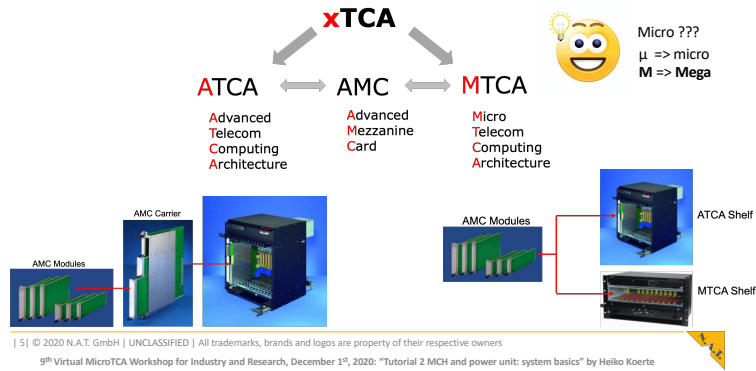

- **PART 0 - About N.A.T.**
- **PART I - Open Standards**
  - Why they are needed and how to benefit from them
  - In a nutshell: the open platform MicroTCA
- **PART II – NAT wireless product line**
  - Introduction
    - Reasons for FPGA based products and goals to achieve
  - Hardware
    - NAT-AMC-ZYNQULP-FMC, NAT-FMC-SDR-x and NAT-AMC-ZYNQULP-SDR
    - NAT-SDR-FLEX-x
    - Packaging
  - Software
    - Generic SDR package
    - Basestation package
- **PART III – SDR Applications**
  - NAT-AMC-ZYNQULP-SDR and NAT-SDR-FLEX-x
  - Use Cases vs. Features
  - Analysis on use case
    - SDR: jamming, direction finding, generic test platform
    - Base station for Campus networks
- **Part IV - Live Demo on Phase Synchronization**
  - Introduction
  - Demonstration

4

## The xTCA family: AdvancedTCA and MicroTCA

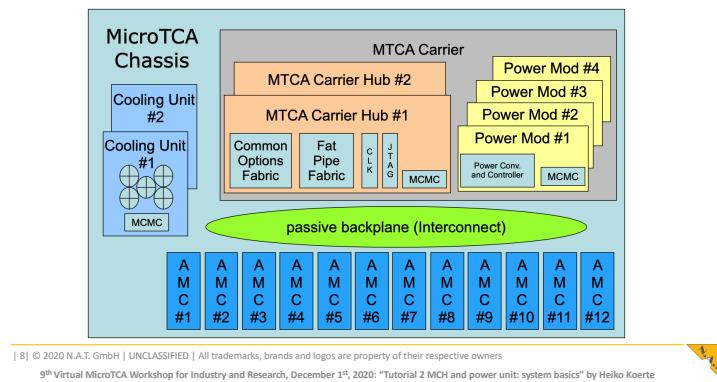

5

## The xTCA family: AdvancedTCA and MicroTCA

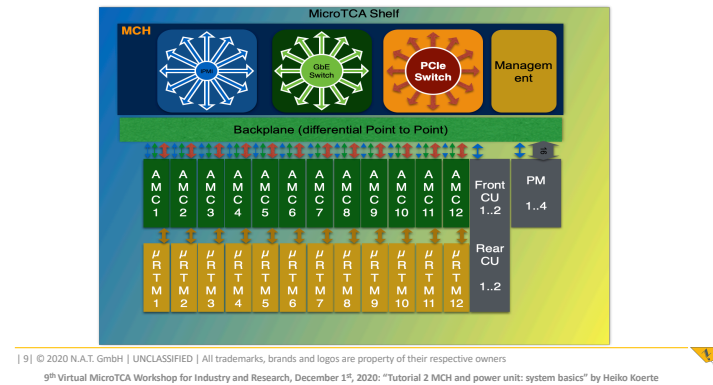

6

## MicroTCA System Architecture: MTCA.0

8

## MicroTCA System Architecture: MTCA.4

9

## MicroTCA building blocks: chassis and power modules

| 10 | © 2020 N.A.T. GmbH | UNCLASSIFIED | All trademarks, brands and logos are property of their respective owners

9th Virtual MicroTCA Workshop for Industry and Research, December 1st, 2020: "Tutorial 2 MCH and power unit: system basics" by Heiko Koerte

10

## MicroTCA building blocks: backplane and MCH

### Backplane

- Passive with star or dual-star topology
- All data transfers are
  - Independent
  - Simultaneous
  - Bi-directional

### Data connections organized in Fabrics:

- Base Fabric:
  - GbE (10GbE with MTCA-NG)
- Fat Pipe Fabric:
  - PCIe Gen3 (MTCA-NG: Gen5)
  - 1GbE, 10GbE, 40GbE (MTCA-NG: 100GbE)
  - SRIO Gen2

### MCH

- Modular concept based on several PCBs with different functionality  
=> Flexible adoption to any communication and performance requirements

9th Virtual MicroTCA Workshop for Industry and Research, December 1st, 2020: "Tutorial 2 MCH and power unit: system basics" by Heiko Koerte

11

## MicroTCA building blocks: MCH

| 12 | © 2020 N.A.T. GmbH | UNCLASSIFIED | All trademarks, brands and logos are property of their respective owners

9th Virtual MicroTCA Workshop for Industry and Research, December 1st, 2020: "Tutorial 2 MCH and power unit: system basics" by Heiko Koerte

12

## MicroTCA System Architecture: MTCA.4

| 13 | © 2020 N.A.T. GmbH | UNCLASSIFIED | All trademarks, brands and logos are property of their respective owners

9th Virtual MicroTCA Workshop for Industry and Research, December 1st, 2020: "Tutorial 2 MCH and power unit: system basics" by Heiko Koerte

13

## MicroTCA System Management: IPMI and I<sup>2</sup>C

### IPMB-L

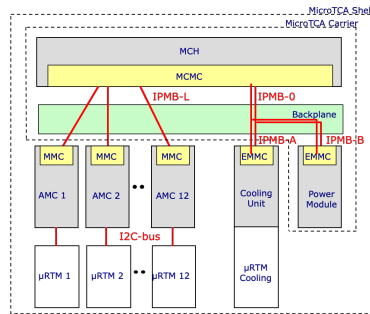

- connects the MCMC on the MCH to the MMC on the AMC Modules
- radial architecture

### IPMB-O .1

- connects the MCMC on the MCH to the EMMC on the PMs and CUs
- bussed architecture

### I2C-bus

- connects the AMC to its  $\mu$ RTM
- the  $\mu$ RTM is treated as managed FRU of the AMC

17

Almost the last slide ...

That's all MicroTCA is about ...

I know, you have heard what was said ...

... but ...

... I am not sure if this was what was meant ...
