

# COSMIC RAY VARIATIONS in November–December, 2012

*Friday, 16 July 2021 19:18 (12 minutes)*

Using ground-based observations of cosmic rays (CR) from the World Network of Neutron Monitor Stations and a method of spectrographic global survey, we have examined variations in rigidity spectrum and galactic CR in November–December 2012.

## Keywords

Neutron Monitors; rigidity spectrum; COSMIC RAY VARIATIONS
