

# Lennart Huth DESY-FTX/Fellow

## Research(Work) Topics

- Monolithic silicon pixel sensors
  - Tangerine project (65nm CMOS)
  - Telepix (180nm HV-CMOS)
- Testbeam/DAQ/telescope analysis
- (Telescope user support)

## Potential topics for this/future meetings

- Get to know silicon experts from other groups
- Provide a platform for the exchange knowledge/ideas beyond the classical group structures
- An open forum for questions (especially from students)
- Short presentations of recent developments (LGAD, CMOS, Sol,...)

## Potential contribution

- HV-CMOS overview/Telepix results (in a few months ;-)
