Horizon Europe - Anforderungen an Open Science und FAIR Data

Thursday, February 25, 2021 9:00 AM (1h 30m)

1. Vortrag

Horizon Europe - Überblick (Mareike Schmitt, KoWi)

Abstract:

Mit „Horizon Europe“ startet nun das nächste Rahmenprogramm für Forschung und Innovation der Europäischen Union. Im Vortrag wird auf die wesentlichen Inhalte und Strukturen des neuen Programms eingegangen, sowie die Aktivitäten und Services von KoWi im Hinblick auf Open Science dargestellt.

2. Vortrag

Driving the paradigm shift towards Open Science: FAIR data (Dr. Carlos Casorrán, European Commission, DG Research Innovation, Unit G.4 Open Science)

Abstract:

Open Science, represents an effective policy solution to overcome many of the problems brought about by an overabundance of data. Open Science holds the key to improving the quality, efficiency and creativity of research, but also the trust by society in science. The European Commission, as a staunch supporter of Open Science, has been promoting its mainstreaming through pilots and requirements in a stepwise approach since 2008, generating traction one step at a time. During this talk the next steps in the promotion of Open Science in Horizon Europe will be discussed, specifically as concerns the management of data and other research outputs. In addition, other activities undertaken by the Commission to promote the FAIRness of data will be discussed, particularly in the context of the current pandemic.

Der Vortrag wird auf Englisch gehalten.

Kurzbiografie:

Dr. Casorrán, a mathematician by training, has been working in the Open Science unit at the Directorate General for Research and Innovation of the European Commission since October 2019. His main tasks involve contributing to the development of European policies in the field of Open Science with a focus on the implementation of the European Open Science Cloud (EOSC) and the implementation of the FAIR data principles (policy, governance and technical aspects).
